	Page
1- INTRODUCTION	1
2- REVIEW OF LETERATURE	4
2.1- Body weight	4
2.2- Body weight gain	7
2.3- Keel and shank lengths as growth parameters	9
2.4- Feed consumption and feed conversion	10
2.5- Performance index and economical efficiency	13
2.6- Carcass characteristics	15
2.7- Serum blood constituents	18
2.8- Mortality rate	22
3- MATERIALS AND METHODS	23
3.1- Management of experimental birds	23
3.2- Grouping birds and experimental design	23
3.3- Chemical composition and analysis of Bio – Tonic , Fermacto, Kemzyme and Zinc bacitracin	26
3.4- Parameters estimated and data collection	29
3.5- Serum blood constituents	32
3.6- Determination of the digestible coefficients of nutrients	33
3.7- Statistical analysis	36
4- RESULTS AND DISCUSSION	37
4.1- Traits of growth parameters	37
4.1.1- Body weight	37
4.1.2- Body weight gain	43
4.1.3- Keel and shank lengths	48
4.2- Parameters of Feed conversion	52
4.2.1- Feed consumption	52
4.2.2- Feed conversion	56
4.3- Performance index	60

4.4- Economical efficiency	page 64
4.5- Mortality rate	68
4.6- Carcass characteristics	70
4.6.1- Absolute and proportional weights of carcass traits	70
4.6.2- Chemical composition of meat	74
4.7- Serum blood constituents	78
4.7.1- Serum total protein , albumin , globulin and A/G ratio	78
4.7.2- Serum alkaline phosphatase and transaminases	82
4.7.3- Serum and tissues uric acid and creatinine	86
4.7.4- Serum total lipids and cholesterol	90
4.8- Digestibility coefficients	94
5- SUMMARY	99
6- REFERENCES	106
7- ARABIC SUMMARY
