I. INTRODUCTION	1
II. REVIEW OF LITERATURE.....	4
A. Effect of surface drip (trickle) irrigation regime on growth, yield and quality of sweet pepper.....	4
1. Vegetative growth.....	4
2. Chemical composition of plant foliage.....	7
3. Fruit yield and its components.....	9
4. Water use efficiency (WUE).....	12
5. Fruit quality.....	13
B. Effect of organic and mineral fertilization on growth, yield and quality of sweet pepper cultivars	15
1. Vegetative growth.....	15
a- Effect of organic manure.....	15
b. Effect of mineral fertilization.....	18
2. Chemical composition of plant foliage.....	21
a. Effect of organic manure.....	21
b- Effect of mineral fertilization.....	23
3. Yield and its components.....	25
1- Effect of Organic manure.....	25
2. Effect of Mineral fertilization.....	28
4. Fruit quality	33
a. Physical fruit quality.....	33

	Page
1. Effect of organic manure	33
2. Effect of mineral fertilization.....	34
b. Chemical Fruit Quality.....	35
1. Effect of organic manure	35
2. Effect of mineral fertilization.....	37
C. Effect of cultivars	39
1. Vegetative growth.....	39
2. Chemical composition of plant foliage.....	41
3. Fruit yield and its components.....	41
4. Fruit quality.....	44
III. MATERIALS AND METHODS	46
First Experiment: Effect of surface drip irrigation regime on growth, yield and quality of some sweet pepper cultivars.....	47
Second experiment: Effect of organic and chemical fertilization on growth, yield and quality of sweet pepper cultivars.....	51
Experimental procedures for the first and the second experiments.....	54
1- Vegetative growth characteristics.....	54
2- Chemical constituents of plant foliage.....	54
3- Fruit yield and its components.....	55
4-Statistical analysis.....	56

	Page
IV. RESULTS AND DISCUSSION	57
4.1. First experiment	57
4.1.1. Vegetative growth characteristics.....	57
4.1.2. Chemical composition of plant foliage.....	60
4.1.3. Fruit yield and its components.....	64
4.1.4. Water use efficiency.....	70
4.1.5. Fruit quality.....	71
4.2. Second experiment:	80
4.2.1. Vegetative growth characteristics.....	80
4.2.2. Chemical compositions of plant foliage....	85
4.2.3. Fruit yield and its components.....	90
4.2.4. Fruit quality.....	94
V. SUMMARY	103
