I. INTRODUCTION	
II. REVIEW OF LITERATURE	
III. MATERIALS AND METHODS	
IV. RESULTS AND DISCUSSION	
1- Isolation and Identification of the causal organisms	
2- Pathogenicity of isolated fungi and their effects on growth characters of faba bean plants	
3- Effect of inoculation with VA-Mycorrhizae on infection with <i>F. solani</i> or <i>R. solani</i> as well as some growth characters of faba bean plants in unsterilized and sterilized soil.	
4- Effect of inoculation with VA-Mycorrhizae and <i>F. solani</i> or <i>R. solani</i> on root colonization with VA-Mycorrhizal fungi	
5- Effect dual treatment with VA-Mycorrhizae and <i>Rhizobium</i> on infection by <i>F. solani</i> or <i>R. solani</i> as well as some growth characters of faba bean plants in un-sterilized and sterilized soil.....	
6- Effect dual treatment with VA-Mycorrhizae and <i>Rhizobium</i> on root colonization with VA-Mycorrhizal fungi.....	
7- Effect of inoculation with VA-Mycorrhizal fungi and seed dressing with some fungicides on the infection with <i>F. solani</i> and <i>R. solani</i> as well as some growth characters of faba bean plants in unsterilized and sterilized soil.....	
8- Effect of inoculation with VA-Mycorrhizae and seed dressing with some fungicides on root colonization with VA-Mycorrhizal fungi..	

➤ Effect of inoculation with VA-Mycorrhizae and fertilization
with superphosphate or rock phosphate on infection by *F. solani*
or *R. solani* and some characters of faba bean plants in unsterilized
and sterilized soil.

■ Effect of inoculation with VA-Mycorrhizae and fertilization
with superphosphate or rock phosphate as a source for phosphate
on root colonization with mycorrhizae in healthy and diseased faba
bean plants with y *F. solani* or *R. solani*.
