

CONTENTS

	PAGE
I - INTRODUCTION	1
II - REVIEW OF LITERATURE	4
A) - Physical & chemical properties of some essential oils	4
B) - Yield and chemical composition of some essential oils ...	4
1 - Parsley oil	4
2 - Dill oil	19
3 - Laurel oil	22
C) - Antimicrobial Activity of some essential oils	27
1 - Antibacterial activity	27
2 - Antifungal activity	33
D) - Antioxidant activity	37
III - MATERIALS AND METHODS	42
A) - Materials	42
1 - Source of essential oils plant	42
2 - Source of essential oils and main components	44

3 - Microorganisms test	45
4 - Antioxidant activity test	46
B) - Methods	46
1 - Physical & chemical properties of essential oils	46
a - Determination of specific gravity	46
b - Determination of refractive index	47
c - Determination of optical rotation (O.R.)	47
d - Acid value, ester number, and ester number after acetylation ...	47
2 - Chemical composition of essential oils	47
3 - Determination of antimicrobial activity	48
a - Disk diffusion method	48
b - Minimum inhibitory concentration	49
4 - Antioxidant activity	50
a - Measurement of specific gravity	50
b - Measurement of refractive index	50
c - Oven test	50
d - Peroxide number	51
e - TBA test	51

5 - Sensory evaluation	52
a - Sensitivity (threshold test)	52
b - Ranking test	53
c - Statistical analysis	53
IV - RESULTS AND DISCUSSION	57
A) Essential oil content	57
B) Determination of the physical and chemical characteristics..	57
C) Chemical composition of some essential oils	60
D) Antimicrobial effect of some essential oils	66
1 - Antibacterial effect	66
2 - Antifungal activity	75
E) - Antioxidant effect	78
F) - Sensory evaluation	98
V - SUMMARY	103
VI - REFERENCES	107
VII - ARABIC SUMMARY
