	Page
- INTRODUCTION	1
- Aim of work	3
REVIEW OF LITERATURE	5
A. Guava fruits	5
1. Chemical composition of guava juice.....	5
2. Volatile flavour components of guava juice.	10
3. Physicochemical changes during ripening of guava fruits.....	16
4. Physicochemical changes during processing and storage of guava juice.....	17
B. Pear fruits.....	23
1. Chemical composition of pear juice.....	23
2. Volatile flavour components of pear fruits.	25
3. Physicochemical changes during maturity of pear fruits.....	31
4. Physicochemical changes during processing and storage of pear puree	42
- MATERIALS AND METHODS	46
<u>Materials :</u>	
a. Guava fruits	46
b. Pear fruits	46
c. Materials for chromatography analysis.....	47

Methods :

a. Preparation of juice.....	47
b. Processing of guava juice and pear compotes..	47
I. Preparation of commercial guava juice	48
II. Pear compotes.....	49
Analytical methods.....	50
Determination of fat	50
Total soluble solids.....	50
Ascorbic acid.....	50
Non reducing sugars.....	51
Carotenoids and chlorophylls.....	51
Pulp content	52
Organoleptic tests.....	52
Chemical analysis of volatile flavouring materials.	53
Recovery of aqueous volatile flavouring materials.	53
Determination of limonene content.....	53
Determination of ester content.....	54
Determination of oxygenated terpenes.....	54
Determination of carbonyl compounds.....	55
Separation and identification of volatile flavour components	55
a. Distillation.....	55
b. Extraction.....	56
c. Gas liquid chromatographic (GLC) analysis.....	56

	Page
Fixed oils of guava and pear fruits.....	57
Preparation of fixed oils.....	57
Gas chromatographic analysis.....	58
a. Preparation of fatty acids methyl esters...	58
b. Analysis of fatty acids methyl esters by GLC.	59
RESULTS AND DISCUSSION	60
I. Physical and chemical composition.....	60
A. Guava fruits	60
1. Physical characteristics.....	60
2. Chemical composition.....	61
3. Volatile flavouring materials of guava juice.	64
4. Processing.....	64
B. Pear fruits	74
1. Physical characteristics.....	74
2. Chemical composition	75
3. Volatile flavouring materials of pear juice..	77
4. Processing.....	77
II. Studies on flavouring components of guava and	
pear fruits.....	87
A. Guava fruits	87
1. Effect of maturity on volatile components of	
guava fruits	87
2. Distribution of volatile components in	
different parts of guava fruits	93

IV

	Page
3. Guava volatile components obtained by different methods.....	98
4. Guava volatile components as indication for methanol as enzyme inhibitor.....	104
5. Distribution of volatile components in pulp and serum of guava juice.....	104
6. Effect of processing and storage at different temperatures on volatile components of guava juice.....	112
B. Pear fruits	119
1. Effect of maturity on volatile components of pear fruits	119
2. Distribution of volatile components in different parts of pear fruits.....	125
3. Pear volatile components obtained by different methods	130
4. Pear volatile components as indication of methanol as enzyme inhibitor.....	136
5. Distribution of volatile components in pulp and serum of pear juice.....	141
6. Effect of storage temperature on volatile components of pear fruits.....	146

	Page
7. Effect of processing and storage at room temperature on volatile components of pear puree	151
III. Fatty acids of ripe guava and pear fruits..	157
IV. Organoleptic evaluation of guava and pear fruits.....	161
1. Effect of maturity on the organoleptic characteristics of guava and pear fruits.	161
2. Effect of processing and storage on the organoleptic characteristics of guava juice and pear puree.....	161
