

Contents

Contents	Page
<u>1- Introduction</u>	6
<u>2- Review of literature</u>	7
2-1- Trace elements is relation to lithology and soil environments	8
2-2- Essential Micronutriens heavey elements .	9
2-2-1- Iron	9
2-2-1-1 Total iron	9
2-2-1-2 Available iron	11
2-2-2- Manganese	12
2-2-2-1- Total manganese	12
2-2-2-2- Available manganese	14
2-2-3- Copper	15
2-2-3-1- Total copper	15
2-2-3-2- Available copper	17
2-2-4- Zinc	18
2-2-4-1- Total Zinc	18
2-2-4-2- Available Zinc	19
2-2-5- Molybdenum	19
2-2-5-1- Total Molybdenum	20
2-2-5-2- Available Molybdenum	21
<u>3- Materials and methods</u>	22
3-1- Field work	23
3-2- Laboratory Analyses .	23
<u>4- Results and discussion</u>	26

Contents	Page
4-1- Morphological characterization of the studies soils.	27
4-2- Soil characteristics	28
4-2-1- Physical properties	28
4-2-1-1- Particale size distribution	28
4-2-1-2- organic matter content	29
4-2-1-3- calcium carbonate content	29
4-2-2- Chemical properties	33
4-2-2-1- Soil reaction	33
4-2-2-2- Total salinity	33
4-2-2-3- Soluble cations and anions	37
4-2-2-4- Cation exchange capacity	38
4-3- Status of micronutrients in soils.	38
4-3-1- Iron	38
4-3-1-1- Total iron	38
4-3-1-2- Available iron	44
4-3-1-3- Depthwise distribution of total iron	46
4-3-4- Manganese	51
4-3-4-1- Total manganese	51
4-3-4-2- Available manganese	56
4-3-4-3- Depthwise distribution of total manganese	58
4-3-5- Copper	60
4-3-5-1- Total copper	60
4-3-8- Available copper	67

Contents	Page
4-3-9- Depthwise distribution of total copper	69
4-3-5- Zinc	73
4-3-5-1- Total zinc	73
4-3-5-2- Available zinc	78
4-3-5-3- Depthwise distribution of total Zinc	80
4-3-6- Molybdenum	81
4-3-6-1- Total molybdenum	81
4-3-6-2- Available molybdenum	
4-3-15- Depthwise distribution of total molybdenum	93
<u>5 - Summary</u>	97
<u>6 - Appendix</u>	102
<u>7 - References</u>	120
<u>8 - Arabic Summary</u>	1
