

CONTENTS

Subject	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURES	3
2.1. Geology.....	3
2.2. Mineralogical properties of shale deposits.....	7
2.3. Geochemistry.....	13
2.3.1. Trace elements.....	13
2.3.2. Radioactive elements.....	15
2.4. Physical and chemical properties of shale deposits.....	17
2.5 Shale uses.....	21
2.6 . Extraction of uranium	27
2.6.1. Leaching reagents	27
2.6.2. Leaching technique	28
3. MATERIAL AND METHODS	30
3.1. Field Work.....	30
3.2. Identification of the studied shale deposit.....	30
3.2.1. Physical and chemical analyses of the studied shale deposits.....	30
3.2.2. Radiometric analysis of the studied shale deposit.....	32
3.2.3. X-ray diffraction analysis.....	32
3.3. Extraction of the poisonous elements.....	33
3.3.1. Choosing of the extractants.....	33

3.3.2. Deduction of the most efficient flow rate of the used extractant.....	35
4. RESULTS and DISCUSSION	38
4.1. Identification of the shale deposit sample.....	38
4.1.1. Mineralogical analysis of the clay fraction separated from the shale sample.....	38
4.1.2. Chemical composition.....	40
4.1.3. Physical and chemical properties	43
4.2. Extraction of the poisonous elements.....	44
4.2.1. The washing by tap water process.....	45
4.2.2. The leaching by H ₂ SO ₄ process.....	63
4.3. Effect acid concentration and solid:liquid ratio on the Mineralogical properties of the shale deposit sample.....	85
4.4. Effect of acid concentration and solid:liquid ratio on the chemical properties of the shale deposit sample.....	89
5. SUMMARY	91
6. REFERENCES	93
ARABIC SUMMARY
