1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. The studied regions	3
2.1.1-El-Maraqui	3
2.1.2-Khamisa.....	3
2.1.3-Siwa.....	3
2.1.4-Aghormi.....	3
2.1.5- Qureishet.....	3
2.1.6-Abu-Shrouf.....	5
2.1.7-El-Zeitun.....	5
2.1.8-Timeria.....	4
2.2-Location (crops and people of Siwa oasis)	5
2.2.1. Location.....	5
2.2.2. Crops and people	6
2.2.3.Climate.....	6
2.4- Geology of Siwa.....	17
2.5- Geomorphology.....	18
2.5.1- The Northern Elevated Plateau	19
2.5.2- The Southern Elevated Plateau.....	20
2.5.3- Siwa floor.....	20
2.6- Water resources	22
2.6.1- The Miocene aquifer.....	22

	Page
2.6.2-The Nubian aquifer	24
2.7- Soils	24
2.7.1- Arable lands and uncultivated lands in Siwa	25
2.8- Topography	26
2.9- Irrigation.....	26
2.10- Drainage.....	28
2.11- Vegetation.....	28
2.11.1-Reed swamps	29
2.11.2-Salt marshes.....	29
2.11.3-Sand formation.....	29
2.11.4-Gravel plains.....	30
2.12- Soil chemical properties.....	30
2.12.1-Salinity	30
2.12.2-Organic matter.....	30
2.12.3-Gypsum.....	30
2.12.4-Soil pH.....	31
2.12.5-Catin exchange capacity (CEC).....	31
2.12.6-Soil sodicity.....	31
2.13- Nutrients in the soil	31
2.14-Layer –silicate colloids of the clay fraction.....	32
2.15- Amorphous colloids of the clay fraction.....	34
2.15.1- Silica (silicon dioxide)	34
2.15.2- Aluminum oxides.....	34

	Page
2.15.3- Iron oxides.....	34
2.16- Heavy and light minerals.....	35
2.16.1- Heavy minerals	35
3- MATERIALS AND METHODS	37
3.1- Field work	37
3.2- Laboratory work.....	37
3.2.1- Physical analysis.....	37
3.2.2- Chemical analysis.....	38
3.2.3- Mineralogical analysis.....	41
4- RESULTS AND DISCUSSION.....	46
4.1- Soil profiles description and brief features of soils of the 8 regions	46
4.1.1- Soils of the El-Maraqui region	46
4.1.2- Soils of the Khamisa region.....	46
4.1.3- Soils of the Siwa region.....	47
4.1.4- Soils of the Aghormi region.....	47
4.1.5- Soils of the Qureishet region.....	47
4.1.6- Soils of the Abu-Shrouf region.....	47
4.1.7- Soils of the El-Zeitun region.....	47
4.1.8- Soils of the Timeira region.....	48
4.2- Chalegorization of soil units.....	48
4.2.1- Particle size distribution and texutre.....	48
4.2.2.- Chalegorization of soil units on basis of soil depth, and texture.....	51

	Page
4.3-Contents of CaCO_3 and size distribution of its particles	54
4.3.1- Calcium carbonate	54
4.3.2- Active calcium carbonate.....	54
4.3.3- Size distribution of CaCO_3 (contents of various size of CaCO_3 particles).....	57
4.4- Other analysis	57
4.4.1-Gypsum	57
4.4.2- Saturation percentage.....	58
4.4.3- Organic matter.....	58
4.4.4- Soil salinity.....	58
4.4.5- Soil pH.....	61
4.4.6-Soluble ions.....	61
4.4.7- Sodium adsorption ratio (SAR).....	61
4.4.8- Potassium adsorption ratio (PAR).....	61
4.5- Cation exchange characteristics and surface area of soil particles	62
4.5.1- Cation exchange capacity (CEC)	62
4.5.2- Exchangeable cations.....	62
4.5.3-Total exchangeable cations.....	62
4.5.4- Exchangeable sodium percentage (ESP actual).....	62
4.5.5- ESP (calculated).....	65
4.5.6- Exchangeable potassium percentage (EPP)..	65

	Page
4.5.7- Total surface area of soil particles.....	65
4.6- Total and available of contents nutrients	65
4.6.1- Macronutrients	65
4.6.1.1-. Nitrogen (N)	65
4.6.1.2- Phosphorus (P).....	68
4.6.1.3- Potassium.....	68
4.6.2- Micronutrients.....	69
4.6.2.1- Iron.....	69
4.6.2.2-Manganese	69
4.6.2.3- Zinc.....	69
4.6.2.4-Copper.....	70
4.7. Depthwise distribution of total contents of each micronutrient	70
4.7.1- Iron (Fe)	72
4.7.2-Manganese (Mn).....	72
4.7.3- Zinc (Zn).....	72
4.7.4- Copper (Cu).....	75
4.8. Depthwise distribution of available micronutrients	75
4.8.1- DTPA-extractable (Fe)	75
4.8.2- Manganese (Mn).....	75
4.8.3- Zinc (Zn).....	76
4.8.4- Copper (Cu).....	76
4.9-Amorphous materials (silica and sesquioxides).....	78

	Page
4.10-Cations exchange capacity (CEC),surface area of soil separates of clay , silt, and fine sand.....	82
4.10.1- Clay size (< 0.002 mm Ø)	82
4.10.2-Silt size (0.02-0.002mm Ø).....	84
4.10.3- Fine sand (0.2-0.02 mm Ø).....	84
4.11- Mineralogy of the very fine sand fraction.....	85
4.11.1-Light minerals	87
4.11.2- Heavy minerals.....	87
4.11.3-Genesis of soils.....	95
4.11.4- Uniformity of soil parent materials	96
4.12- Mineralogy of the clay fraction (< 0.002 mm Ø)..	98
4.12.1-Conclusive remarks on mineralogy of the clay fraction.....	110
4.13-Mineralogy of the silt fraction (0.02-0.002 mm Ø)	110
4.14- Mineralogy of the fine sand fraction (0.02-0.002 mm Ø).....	122
4.15-Land capability classification.....	123
4.16- Macro and micro-nutrients in soils of Siwa and their relationships with silt and clay mineralogy of the soil as well as some others parameters.....	134
4.16.1. Simple correlation	134
4.16.2.Multiple(Mc) and twpwise (sc) corrolations	148
5. SUMMARY	155
6. REFERENCES	164
7. APPENDIX	175
8. ARABIC SUMMARY	--
