	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. Location	3
2.2. Climate	5
2.3. Geology	10
2.4. Geomorphology	21
2.5. Topography	29
2.6. Formation of the depression	32
2.7. Native vegetation and Land use	35
2.8. Water resources	36
2.9. Soil characteristics	37
2.9.1. Physical properties	37
2.9.2. Chemical properties	38
2.9.3. Mineralogical properties	41
2.9.4. Soil classification	45
3. MATERIALS AND METHODS	46
3.1. Field work	46
3.2. Sample preparation	46
3.3. Laboratory analyses	49
3.3.1. Physical analysis	49
3.3.2. Chemical analysis	50
3.3.3. Mineralogical analysis	51
4. RESULTS AND DISSCUSSION	54
4.1. Geomorphic units of the studied area	54
4.1.1. Soil components of El Kharga Oasis	57
4.1.1.1. El Kharga Soils	57

4.1.1.2. El Kharga, El Gazair and Baris soils	61
4.1.1.3. El Kharga, and Qasr Zaiyan soils	72
4.1.1.4. El Aguz soils	80
4.2. Soil physical properties	83
4.2.1. Particle size distribution	83
4.2.2. Grain size analysis	86
4.2.3. Some soil moisture characteristics	100
4.3. Soil chemical properties	102
4.3.1. Soil salinity	102
4.3.2. Soluble cations and anions	105
4.3.3. Soil reaction (pH)	105
4.3.4. Calcium carbonate content	106
4.3.5. Gypsum content	109
4.3.6. Organic matter content	109
4.3.7. Cation exchange capacity and exchangeable cations	110
4.4. Soil mineralogical properties	110
4.4.1. Crystalline minerals of the clay fraction	110
4.4.2. Amorphous inorganic materials	142
4.4.3. Coefficient of linear extensibility "COLE" in relation to some soil properties	145
4.5. Soil classification	147
4.6. Land capability classification	151
5. SUMMARY	164
6. REFERENCES	172
7. ARABIC SUMMARY
