

CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. Concept of the salt-affected soils.....	3
2.2. Nutrients in the soil	4
2.3. Chemical composition of the sea water.....	4
2.4. Effect of irrigation water salinity on some chemical soil characteristics.....	5
2.4.1. Soil salinity (EC).....	5
2.4.2. Soluble anions and cations in soil.....	6
2.4.3. Soil reaction (pH).....	7
2.4.4. Sodium adsorption ratio (SAR).....	7
2.4.5. Availability of some nutrients in soil	8
2.4.5.1. Phosphorus (P).....	8
2.4.5.2. Manganese (Mn).....	8
2.4.5.3. Zinc (Zn).....	9
2.5. Effect of salinity of irrigation water on plant growth ..	11
2.5.1. Dry matter yield (DM)	11
2.5.2. Nutrients concentration and uptake by plants	14
2.5.2.1. Phosphorus (P).....	14
2.5.2.2. Manganese (Mn).....	16
2.5.2.3. Zinc (Zn).....	18
3. MATERIALS AND METHODS	22
3.1. Soil sampling.....	22
3.2. Sea water sampling.....	22
3.3. Experimental work	22
3.3.1. The incubation experiment	22
3.3.2. Greenhouse experiment.....	26
3.4. Laboratory analyses.....	27

3.4.1. Soil analyses	27
3.4.2. Water analyses	28
3.4.3. Plant analyses	29
4. RESULTS AND DISCUSSION	30
4.1. Effect of irrigation with diluted sea water on some soil chemical properties	30
4.1.1. Soil salinity (EC).....	30
4.1.2. Soluble anions and cations in the soil	37
4.1.3. Sodium adsorption ratio (SAR).....	40
4.1.4. Soil reaction (pH).....	42
4.2. Availability of some nutrients in the soil as affected by salinity of irrigation water.	45
4.2.1. Phosphorus (P)	45
4.2.2. Manganese (Mn)	49
4.2.3. Zinc (Zn).....	52
4.3. Effect of salinity irrigation water on plant growth	56
4.3.1. Dry matter yield	56
4.3.2. Phosphorus in plants	63
I. Phosphorus concentration	63
II. Phosphorus uptake by plant	66
4.3.3. Manganese in plants	70
I. Manganese concentration.....	70
II. Manganese uptake by plants	73
4.3.4. Zinc in plant	78
I. Zinc concentration	78
II. Zinc uptake by plants	81
5. SUMMARY	86
6. REFERENCES.....	92
ARABIC SUMMARY.....
