	PAGE
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	4
2.1. Effect of dietary levels of vitamin A and E on plasma vitamin A, E, calcium and phosphorus concentrations in broiler chicks	6
2.1.1. Vitamin A and E in plasma	6
2.1.2. Plasma levels of calcium and phosphorus.....	10
2.2. Effect of dietary levels of vitaminA and E on lipid composition and liver function of broiler chicks	11
2.2.1. Effect of dietary levels of vitamins A and E on lipid composition	12
2.2.2. Effect of dietary vitamin A and E levels on liver function.....	16
2.3. Effect of dietary vitamin E levels on meat stability of broiler chicks	19
2.4. Effect of dietary levels of vitamins A and E on body weight gain, feed efficiency and mortality of broiler chicks.....	22
2.5. Stability of vitamins A and E in mixed feeds and premises	26
3. MATERIALS AND METHODS	32
3.1. Nutritional experiment	32
3.1.1. Average body weight, weight gain and rate of growth	34
3.1.2. Feed consumption and efficiency	34
3.1.3. Blood plasma samples	35
3.1.4. Blood analysis	35
3.1.4.1. Plasma GOT	35
3.1.4.2. Plasma GPT	36
3.1.4.3. Plasma alkaline phosphatase activity	37
3.1.4.4. Plasma total lipids	38

3.1.4.5. Plasma triglycerides	38
3.1.4.6. Plasma phospholipids	38
3.1.4.7. Plasma cholesterol	38
3.1.4.8. Plasma calcium	38
3.1.4.9. Plasma phosphorus	38
3.1.5. Determination of vitamin A and E by HPLC	39
3.1.6. Storage stability of meat	40
3.2. Storage of feeds and premixes	40
3.2.1. Materials	40
3.2.2. Acid value and peroxide value	41
3.2.3. Iodine value	41
3.2.4. Thiobarbituric acid (TBA) number	41
3.2.5. Gas liquid chromatography analysis of fatty acids..	41
3.2.5.1. Methylation	41
3.2.5.2. Determination of fatty acids by GLC	42
3.3. Statistical analysis of data	42
4. RESULTS AND DISCUSSION	43
4.1. Effect of dietary levels of vitamin A and E on plasma vitamin A, E, calcium and phosphorus	43
4.1.1. Plasma vitamin A and E concentrations	43
4.1.2. Plasma calcium and phosphorus concentrations	48
4.2. Effect of dietary levels of vitamin A and E on lipid composition and liver function of Hubbard broiler chicks	54
4.2.1. Lipid composition of Hubbard broiler chicks	54
4.2.1.1. Plasma total lipids and triglycerides	54
4.2.1.2. Plasma phospholipids and cholesterol	58
4.2.2. Effect of dietary levels of vitamin A and E on liver function of Hubbard broiler chicks.....	64
4.2.2.1. Plasma GOT	64
4.2.2.2. Plasma GPT	68
4.2.2.3. Plasma APA	71
4.3. Effect of dietary vitamin E levels on the stability of broiler meat	75
4.4. Effect of dietary vitamin A and E on growth parameters	79

4.4.1. Body weight, weight gain and rate of growth	79
4.4.2. Feed consumption, efficiency and mortality	89
4.5. Storage of mixed feeds and premixes	95
4.5.1. Effect of storage on chemical properties of fat in mixed feeds and premixes	95
4.5.2. Effect of storage on fatty acid composition of mixed feeds and premixes	103
4.5.3. Effect of storage on vitamin A and E concentration of mixed feeds and premixes	110
5. SUMMARY	116
6. REFERENCES	122
7. ARABIC SUMMARY
