1. Introduction	1
2. Review of literature	3
2.1. Nutrients in the soil plant system	3
2.2. General information about leucaena	3
2.2.1. Leucaena and soil fertility	5
2.2.2. Leucaena as food and feed source and feedstuff	6
2.2.3. Leucaena as a source of fuel and conservation cropping	7
2.2.4. Leucaena and its content of polyphenols	7
2.3. Composts and composting of organic matter	8
2.3.1. Decomposition processes in composting	9
2.3.2. Organisms involved in composting	10
2.3.3. Compost and the CN ratio	10
2.3.4. Composting techniques	11
2.4. Organic manure and mineralization– immobilization processes	12
2.5. Mineralization and the C/N ratio of organic materials	14
2.6. Residue management and soil fertility	16
2.6.1. Complete removal of residues	16
2.6.2. Partial removal of residues	17
2.6.3. Incorporation of all plant residues in soil	18
2.7. N–recovery and the use of ¹⁵ N technique	18
2.7.1. Loss and recovery of added N	19
3. Materials and Method	23
3.1. Materials	23
3.1.1. Soil	23
3.1.2. Plants	23
3.1.3. Chemical reagents and fertilizers	23
3.1.4. Organic materials	27
3.2. Experimental work	27
3.2.1. Inoculation experiment	28
3.2.2. Pot experiments	28
3.2.2.1. Experimental design and treatments of the pot experiments	30
3.2.3. Field experiments	30
3.2.3.1. The lupines field experiment	31
3.2.3.2. The barley field experiment	31
3.3. Analytical procedures	31
3.3.1. Soil analysis	31
3.3.2. Plant analysis	31
3.4. Isotope dilution	31

3.4.1.	Principles and equations	31
3.4.2.	^{15}N analysis	32
3.4.	3 Calculation of N derived from various sources	33
3.4.4.	Calculation of % recovery of fertilizer ^{15}N (% RFN)	34
3.4.5.	Calculating labile N (L value)	35
4.	Results and Discussion	36
4. 1.	The inoculation experiment	36
4.1.1.	Content of available N in soil as affected by time, inoculation and organic source.	36
4.1.1.1.	Assessment of the effect of time	37
4.1.1.2.	Assessment on the effect of inoculation	39
4.1.1.3.	Assessment of the effect of organic source	41
4. 2.	^{15}N pot experiment	44
4. 2. 1.	The lupine ^{15}N experiment	44
4.2.1.I.	Dry weight of lupine shoots	45
4.2.1.II.	Nitrogen-uptake of lupine shoots	47
4.2.1.III.	Dry weight of lupine roots	49
4.2.1. IV.	Nitrogen-uptake of lupine roots	51
4.2.1.V.	Dry weight of lupine nodules	53
4.2.1. VI.	Nitrogen-uptake by lupine nodules	55
4.2.1.VII.	Available nitrogen remaining in soil after lupine harvest	56
4.2.2	The Barley ^{15}N experiment	58
4.2.2.I.	Dry weight of barley shoots	58
4.2.2.II.	Nitrogen-uptake of barley shoots	60
4.2.2.III.	Available nitrogen remaining in soil after barley harvest	61
4.2. 3.	Follow-up of fertilizer ^{15}N in plant parts	63
4.2.3.I.	Fertilizer ^{15}N absorbed by lupine	63
4.2.3.II.	Fertilizer ^{15}N absorbed by barley	63
4.2.4.	Recovery of fertilizer ^{15}N concerns the portion of fertilizer ^{15}N recovered in plant tissues	67
4.2.4.I.	Recovery of ^{15}N in lupine plant	68
4.2.4.II.	Recovery of ^{15}N in barley plant	68
4.2.4. III.	Labile N in soil "L value"	69
4. 3.	Field Experiment	70
4. 3.1.	Lupine experiment	70
4.3.II.	Weight of whole plants of lupine	71
4.3.III.	Weight of dry roots of lupine	71
4.3.1.III.	Nitrogen-uptake by dry roots of lupine	72
4.3.IV.	Weight of dry shoots of lupine	74
4.3.1.V.	Nitrogen-uptake by dry shoots of lupine	76
4.3.1.VI.	Yield of seeds of lupine	78
4.3.1.VII.	Nitrogen-uptake by seeds of lupine	79

4.3.1. VIII.	Available nitrogen remaining in soil after lupine harvested	82
4. 3. 2.	Barley experiment	84
4.3.2.I.	Yield of whole plants of barley	84
4.3.2.II.	Weight of grains with spikes of barley	86
4.3.2.III.	Nitrogen-uptake by grains with spikes of barley	88
4.3.2.IV.	Yield of shoots straw of barley	90
4.3.2.V.	Nitrogen-uptake by straw of barley	92
4.3.2.VI.	Yield of roots of barley	94
4.3.2.VII.	Nitrogen-uptake by roots of barley	96
4.3.2.VIII.	Available nitrogen which remained in soil after barley harvested.....	98
5.	General conclusion, overall trends, and practical implications	100
5.1.	Inoculation experiment	100
5.2.	Greenhouse experiments (¹⁵ N)	100
5.3.	Field experiments	103
5.4.	Practical implication	106
6.	Reference	107
7.	Appendixes	121
8.	Arabic summary	1
