1.INTRODUCTION.....	1
2.REVIEW OF LITERATURE.....	3
2.1. Available phosphorus and Zinc.....	3
2.1.1. Phosphorus.....	3
2.1.2. Zinc.....	4
2.2. Soil Phosphate Potential and Buffering Capacity.....	5
2.3. Adsorption of Phosphorus and Zinc	6
2.3.1. Phosphorus	6
2.3.2. Zinc	7
2.4.Phosphorus and Zinc Sorption Isotherm	8
2.4.1.Parameters of Langmuir adsorption isotherm	9
2.4.1.1. Phosphorus parameters	9
I) The adsorption maximum.....	9
II) Affinity Constant (K)	10
2.4.1.2. Zinc.....	10
2.4.2.Van –Huay isotherm.....	11
2.4.3. Fruendlich isotherm.....	11
2. 5. Factors Affecting P – Sorption by Soil Components .	12
2.5.1.Clay content.....	12
2.5.2.Calcium carbonate content.....	12
2.5.3.Soil reaction	13

2.5.4.Organic matter content	13
2.5.5.Iron oxid.....	15
2.5.6.Surface area.....	15
2.6. Factors Affecting Zn – Sorption by Soil Components .	16
2.6.1.Clay content.....	16
2.6.2.Calcium carbonate content.....	16
2.6.3.Soil reaction.....	17
2.6.4.Organic matter content.....	17
2.6.5.Iron oxides.....	18
2.6.6.Surface area.....	19
2.7. P-Zn Interaction in Soil.....	19
2.8. P-Zn Interaction in Plant.....	20
3. MATERIAL AND METHODS.....	22
3.1. Soil Sampling.....	22
3.2.Experimental Work	22
3.2.1. Phosphate potential.....	22
3.2.2. Phosphate potential buffering capacity.....	23
3.2.3 Phosphorus adsorption in the absence of added organic ligands	23
3.2.4.Zn- adsorption in the absence of added organic ligands..	23
3.2.5. P- and Zn- adsorption in the presence of organic ligands (added before equilibrium of each	27

element with the soil).....	
3.2.6. P- and Zn- adsorption in the presence of organic ligands (added after equilibrium of each element with the soil).....	27
3.2.7. calculation of sorption parameters.....	27
3.2.8. Greenhouse experiment.....	28
3.5. Analyses of Soil and Plant	29
3.5.1. Soil analyses.....	29
3.5.2. Plant analysis.....	31
3.6. Statistical Analysis.....	31
4- RESULTS AND DISCUSSION.....	32
4.1. Soil Available Phosphorus.....	32
4.2. Soil Available Zinc.....	32
4.3. Phosphate potential and buffering capacity (PBC)	34
4.3.1. Soil phosphate potential.....	34
4.3.2. Capacity factor (Q).....	37
4.3.3. Differential potential buffering capacity (DPBC)	40
4.3.4. Equilibrium phosphate potential (Ie).....	41
4.4. P-adsorption Parameters According to Langmuir Isotherm.....	42
4.4.1. P-max without application of organic ligands before P-adsorption	42
4.4.2. P-max with organic ligands addition before P adsorption	42
4.4.3. P-max with organic ligands addition after P- adsorption.....	56

4.4.4. Bonding energy without application of organic ligands.....	67
4.4.5. Bonding energy with organic ligands addition before P- adsorption.....	68
4.4.6. Bonding energy with organic ligands addition after P- adsorption.....	69
4.5. P. Adsorption Parameter According to Van- Huay Isotherm	70
4.5.1. Affinity constant without application of organic ligands.....	70
4.5.2. Affinity constant with organic ligands addition before P- adsorption.....	70
4.5.3. Affinity constant with organic ligands addition after P- adsorption.....	71
4.5.4. Theortical P-desorption without application of organic ligands.....	71
4.5.5. Theoretical P-desorption with organic ligands addition before P-adsorption.....	71
4.5.6. Theortical P-desorption with organic ligands addition after P- adsorption.....	72
4.6. Zn-Adsorption Parameter According to langmuir Isotherm.....	72
4.6.1. Zn- adsorption maximum without application of organic ligands	72
4.6.2. Zn -adsorption maximum with organic ligands addition before Zn-adsorption.....	74
4.6.3. Zn adsorption maximum with organic ligands addition after Zn- adsorption.....	80
4.6.4. Bonding energy without application of organic ligands.....	87

4.6.5. Bonding energy with organic ligands addition before Zn- adsorption.....	87
4.6.6. Bonding energy with organic ligands addition after Zn- adsorption.....	87
4.7. Zn-Adsorption Parameter According to Van-Huay Isotherm.....	88
4.7.1. Affinity constant without application of organic ligands.....	88
4.7.2. Affinity constant with organic ligands addition before Z adsorption.....	88
4.7.3. Affinity constant with organic ligands addition after Zn- adsorption.....	89
4.7.4. Theoretical Zn -desorption without application of organic ligands.....	89
4.7.5.Theoretical Zn- desorption with organic ligands addition before Zn-adsorption.....	89
4.7.6.Theoretical Zn- desorption with organic ligands addition after Zn-adsorption.....	90
4.8. Greenhouse Experiment.....	90
4.8.1. Effect of organic matter, phosphorus and zinc application and their interaction on dry matter yield of barley.....	90
4.8.1.1.Organic matter	91
4.8.1.2.Phosphorus	97
4.8.1.3.Zinc.....	98
4.8.1.4.Organic matter vs. phosphorus	99
4.8.1.5.Organic matter vs. Zinc.....	100
4.8.1.6.Phosphorus vs. Zinc.....	102

4.8.1.7.Organic matter vs. phosphorus vs. zinc.....	103
4.8.2. Effect of organic matter, phosphorus and zinc application and their interaction on P and Zn content in barley plants	104
4.8.2.1.Organic matter.....	104
4.8.2.2.Phosphorus.....	112
4.8.2.3.Zinc.....	116
4.8.2.4.Organic matter Vs. Phosphorus.....	117
4.8.2.5.Organic matter Vs. Zinc.....	120
4.8.2.6. Phosphorus Vs. Zinc	120
4.8.2.7.Organic matter Vs. Phosphorus Vs. Zinc	126
5-SUMMARY.....	128
6-REFERENCES.....	132
7- ARABIC SUMMARY.....
