	Page
1- INTRODUCTION.....	1
2- REVIEW OF LITERATURE.....	3
2.1. Phosphorus in soils.....	3
2.2. Phosphorus sources in soils and the factors affecting their availability to plants.....	4
2.2.1. Availability of soil P in relation to nitrogen fertilization.....	6
2.2.1.1. Availability of soil P in relation to the form of N fertilization....	11
2.2.1.2. Availability of soil P in relation to the method of application of N fertilizer.....	15
2.2.1.3. Availability of soil P in relation to nitrification inhibitor (N-serve) ..	17
2.2.2. Availability of soil P in relation to organic manuring.....	21
2.2.3. Availability of soil P in relation to soil moisture content.....	25
2.2.4. Availability of soil P in relation to soluble salts.....	31
2.2.5. Availability of soil P in relation to soil pH.....	36
2.2.6. Availability of soil P in relation to calcium carbonate content.....	39
3- MATERIALS AND METHODS.....	43
3.1. Soil sampling.....	43
3.2. Characterizing the soil samples.....	43
3.3. Experimental work.....	43
3.3.1. Experiment I.....	43

3.3.2. Experiment II.....	46
3.3.3. Experiment III.....	47
3.4. Procedures of analysis.....	51
3.4.1. Soil analysis.....	51
3.4.2. Plant analysis.....	52
4- RESULTS AND DISCUSSION.....	53
4.1. Experiment I.....	53
4.1.1. Effect of nitrogen form and nitrification inhibitor (N-serve) on the dry matter yield of soybean plants.....	53
4.1.2. Effect of nitrogen form and nitrification inhibitor (N-serve) on P concentration in soybean plants.....	57
4.1.3. Effect of nitrogen form and nitrification inhibitors (N-serve) on P-uptake by soybean plants.....	63
4.1.4. Effect of nitrogen form and nitrification inhibitor (N-serve) on the availability of soil P.....	69
4.2. Experiment II.....	75
4.2.1. Effect of soil moisture content and rate of nitrogen fertilization on dry matter yield of barley plants.....	75
4.2.1.1. Effect of soil moisture content...	75
4.2.1.2. Effect of nitrogen fertilization..	80
4.2.1.3. Dry matter yield as affected by interactions of soils with mois- ture content and rate of N ferti- lization.....	82

4.2.2. Effect of soil moisture content and rate of nitrogen fertilization on P concentration in barley plants.....	85
4.2.2.1. Effect of soil moisture content on P concentration.....	86
4.2.2.2. Effect of nitrogen fertilization on P concentration.....	87
4.2.2.3. P concentration in barley plants as affected by interactions of soils with moisture content and rate of N fertilization.....	90
4.2.3. Effect of soil moisture content and rate of nitrogen fertilization on P uptake by barley plants.....	90
4.2.3.1. Effect of soil moisture content on P-uptake.....	93
4.2.3.2. Effect of nitrogen fertilization on P uptake.....	97
4.2.3.3. P uptake by barley plants as affected by interactions of soils with moisture content and rate of N fertilization.....	100
4.3. Experiment III.....	103
4.3.1. Effect of organic manuring on dry matter yield of soybean plants.....	103
4.3.2. Effect of organic manuring on P concentration in soybean plants at different growth periods.....	108
4.3.3. Effect of organic manuring on P uptake by soybean plants at different growth periods.....	113

page

4.3.4. Soil available P as affected by different organic manuring.....	118
5- SUMMARY.....	124
6- REFERENCES.....	128
7- ARABIC SUMMARY.
