

4.1.1. Soil Reaction (pH) -----	37
4.1.2. Total soluble salts(ECe) -----	37
4.1.3 Soil Soluble Ions -----	41
4.1.4. Sodium Adsorption Ratio -----	45
4.1.5. Bases Exchange -----	45
4.2. Soil physical Properties -----	53
4.2.1. Soil Organic matter-----	53
4.2.2. Carbonate content -----	57
4.2.3 Partical Size Distribution -----	57
4.2.4. Soil aggregates and aggregate size distribution -----	58
4.2.4.1. Total Stable Aggregates (TSA) -----	59
4.2.4.2. Mean Weight Diameter (MWD.) -----	67
4.2.4.3. Aggregate size distribution-----	70
4.2.5. Soil porosity , pore size distribution and soil moisture constants-----	78
4.2.5.1. Total porosity-----	78
4.2.5.2. Pore Size Distribution -----	85
4.2.5.3 Soil Moisture Contents-----	86
5 . SUMMARY-----	93
6. REFERENCES-----	99
ARABIC SUMMARY-----	

Contents

1. INTRODUCTION -----	1
2. REVIEW OF LITERATURE-----	2
2.1. Soil salinity-----	2
2.1.1. Defination -----	2
2.1.2. Soil Salinity types -----	2
2.1.3. Reclamation of salt affected soil -----	4
2.2. Soil Structure -----	8
2.2.1. Defination -----	8
2.2.2. Importance -----	9
2.2.3. Formation -----	9
2.2.4. Factors affecting soil structure-----	10
2.3. Soil Hydraulic properties -----	19
2.3.1. Soil Moisture contents -----	19
2.3.2. Soil Porosity and Pore Size Distribution -----	21
2.3.3 Soil Permeability -----	23
3. MATERIALS AND METHODS -----	27
3.1. Morphological features of sampling area. -----	27
3.2. Methods of soil Analysis -----	33
3.2.1. Chemical Analysis-----	33
3.2.2. Physical Analysis -----	34
4. RESULTS AND DISCUSSION -----	37
4.1. Soil Chemical Properties-----	37
