1. INTRODUCTION	
2. REVIEW OF LITRERATURE	
2.1. Irrigation.....	1
2.1.1. Sprinkler irrigation.....	1
2.1.2. Drip irrigation.....	4
2.2. Inoculation.....	8
2.2.1. The use of <i>Bacillus megaterium</i> as a phosphate dissolving micro-organisms.....	10
2.2.2. The use of <i>Paenibacillus polymyxa</i> as a phosphate dissolving micro-organisms.	13
2.3. Effect of nitrogen source.....	14
2.3.1. Nitrogen source and plants.....	14
2.3.2. Nitrogen source and soil.....	15
2.4. Effect of phosphorus source.....	16
2.4.1. Phosphorus source and plants.....	16
2.4.2. Phosphorus source and soil.....	17
3. MATERIALS AND METHODS	20
3.1. Soil analysis of soil and design of the experimental.....	20

3.1.1. Sources and rates of the tested fertilizers.....	21
3.1.2. Implementations of treatments.....	21
3.1.2.1. N-fertilization.....	21
3.1.2.2. P- fertilization.....	22
3.1.2.3. Inoculation.....	22
3.2. Sampling soil and plant	22
3.2.1. Soil and farmyard manure analysis.....	23
- Soil particle size distribution.....	23
- Soil salinity.....	23
- Soil pH.....	23
- Soluble cations and anions.....	23
3.2.1.2. Plant analysis.....	24

4. RESULTS AND DISCUSSION. 29

4.1. Effects on N uptake at flowering stage (Table 2).....	29
4.1.1. Main of irrigation system.....	29
4.1.2. Main effect of inoculation.....	29
4.1.3. Main effect of nitrogen source.....	30
4.1.4. Main effect of P source.....	30
4.1.5. Interaction effects of N source and inoculation...	30
4.1.6. Interaction effect of P source and inoculation...	30
4.2. Effect on P uptake at flowering stage (Table 3).....	35
4.2.1. Main effect of irrigation system.....	35

4.2.2. Main effect of inoculation.....	35
4.2.3. Main effect of N source.....	35
4.2.4. Main effect of P source.....	36
4.2.5. Interaction effect of N source and inoculation...	36
4.2.6. Interaction effect of P source and microbial inoculation.....	37
4.3. Effect on K-uptake at flowering (Table4).....	41
4.3.1. Main effect of the irrigation system.....	41
4.3.2. Main effect of inoculation.....	41
4.3.3. Main effect of N sources.....	41
4.3.4. Main effect of P source.....	42
4.3.5. Interaction effect of N source and inoculation on K uptake.....	42
4.3.6. Interaction effect of P- source and inoculation on K uptake.....	42
4.4. Effects on N-uptake at harvest (Table 5).....	47
4.4.1. Main effect of the irrigation system.....	47
4.4.2. Main effect of inoculation on N uptake.....	47
4.4.3. Main effect of N source on N uptake.....	47
4.4.4. Main effect of P-source on N uptake.....	47
4.4.5. Effect of N source and inoculation interaction on N uptake.....	48
4.4.6. Interaction effect of P source and inoculation on N uptake	48

4.5. Effect on P-uptake at harvest (Table 6).....	52
4.5.1. Main effect of irrigation system.....	52
4.5.2. Main effect of inoculation.....	52
4.5.3. Main effect of N source.....	52
4.5.4. Main effect of P source on (PU).	53
4.5.5. Interaction effect of N sources and inoculation.....	53
4.5.6. Interaction effect of P source and inoculation.	54
4.6. Effect on K uptake at harvest.....	58
4.6.1. Main effect of irrigation system.....	58
4.6.2. Main effect of inoculation.....	58
4.6.3. Main effect of nitrogen source.	58
4.6.4. Main effect of phosphorus source.....	58
4.6.5. Interaction effect of N source and inoculation.....	58
4.6.6. Effect of P source and inoculation.....	59
4.7. Effect on available N in soil at 60 and 120 day Periods of growth.....	63
4.7.1. Main effect of irrigation system.....	63
4.7.2. Main effect of inoculation.	63
4.7.3. Main effect of nitrogen source.....	64
4.7.4. Main effect of phosphorus source.....	64
4.7.5. Interaction effect of N- source and inoculation.....	64

4.7.6. Interaction effect of P-source and inoculation.	65
4.8. Effect on available P in soil.....	70
4.8.1. Main effect of irrigation system.....	70
4.8.2. Main effect of inoculation.....	70
4.8.3. Main effect of nitrogen source.....	70
4.8.4. Main effect of phosphorus source.	71
4.8.5. Interaction of N-source and inoculation. ...	71
4.8.6. Interaction effect of P-source and inoculation.....	71
4.9. Effect on available K in soil.....	77
4.9.1. Main effect of irrigation system.....	77
4.9.2. Main effect of inoculation.....	77
4.9.3. Main effect of nitrogen source.....	77
4.9.4. Main effect of phosphorus source.....	78
4.9.5. Interaction effect of N-source and inoculation.....	78
4.9.6. Interaction effect of P source and inoculation.	78
4.10. Effect on 100-grain weight and yield of maize grains.	83
4.10.1. Main effect of irrigation system.....	83
4.10.2. Main effect of inoculation.....	83

4.10.3. Main effect of nitrogen source.....	84
4.10.4. Main of phosphorus source.....	84
4.10.5. Interaction effect of N-source and inoculation.....	84
4.10.6. Interaction effect of P source and inoculation.....	85
5. SUMMARY.....	90
6. REFFRANCES.....	93
ARABIC SUMMARY	

LIST OF TABLES

Table	Page
1 Some main properties of soil of the experiment field, and of the farmyard manure.	26
1a Soil Particle size distribution.....	26
1b Chemical analysis of the tested soil.....	27
1c Chemical analysis of the farmyard manure.....	28
2 N-uptake by maize (mg plant^{-1}) at flowering stage under the tested treatments.....	32
3 P-uptake by maize (mg plant^{-1}) at flowering stage under the tested treatments.....	38
4 K-uptake by maize (mg plant^{-1}) at flowering stage under the tested treatments.....	44
5 N-uptake by maize (mg plant^{-1}) at harvesting stage under the tested treatments.....	49
6 P-uptake by maize (mg plant^{-1}) at harvesting stage under the tested treatments.....	55
7 K-uptake by maize (mg plant^{-1}) at harvesting stage under the tested treatments.....	60
8 N content of soil by maize (mg kg^{-1}) at flowering and harvesting stage under the tested treatments.....	66
9 P content of soil by maize (mg kg^{-1}) at	

	flowering and harvesting stage under the tested treatments.....	73
10	K content of soil by maize (mg kg^{-1}) at flowering and harvesting stage under the tested treatments.....	79
11	Effect of microbial inoculation, N and P fertilization and farmyard manure application on weight of 100 grains and grain yield of maize under drip and sprinkler irrigation.....	86

List of figure

Fig	Page
1 Effect of micropial inoculation, N and P fertilization and farmyard application on N-uptake at flowering stage under drip and sprinkler irrigation.....	34
2 Effect of micropial inoculation, N and P fertilization and farmyard application on P-uptake at flowering stage under drip and sprinkler irrigation.....	40
3 Effect of micropial inoculation, N and P fertilization and farmyard application on K-uptake at flowering stage under drip and sprinkler irrigation.....	46
4 Effect of micropial inoculation, N and P fertilization and farmyard application on N-uptake at harvesting under drip and sprinkler irrigation.....	51
5 Effect of micropial inoculation, N and P fertilization and farmyard application on P-uptake at harvesting stage under drip and sprinkler irrigation.....	57
6 Effect of micropial inoculation, N and P fertilization and farmyard application on K-uptake at harvesting stage under drip and sprinkler irrigation.....	62

7	Effect of micropial inoculation, N and P fertilization and farmyard application on N content of soil at flowering stage under drip and sprinkler irrigation.....	68
8	Effect of micropial inoculation, N and P fertilization and farmyard application on N content of soil at harvesting stage under drip and sprinkler irrigation.....	69
9	Effect of micropial inoculation, N and P fertilization and farmyard application on P content of soil at flowering stage under drip and sprinkler irrigation.....	75
10	Effect of micropial inoculation, N and P fertilization and farmyard application on K content of soil at flowering stage under drip and sprinkler irrigation.....	76
11	Effect of micropial inoculation, N and P fertilization and farmyard application on K content of soil at flowering stage under drip and sprinkler irrigation.....	81
12	Effect of micropial inoculation, N and P fertilization and farmyard application on K content of soil at harvesting stage under drip and sprinkler irrigation.....	82
13	Effect of micropial inoculation, N and P fertilization and farmyard application on weight of 100-maize grain under drip and sprinkler	

	irrigation.....	88
14	Effect of micropial inoculation, N and P fertilization and farmyard application on the grain yield under drip and sprinkler irrigation.....	89
