	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	5
2.1. Ethoprophos	5
2.1.1. Persistence of ethoprophos pesticide in soil	5
2.1.2. Persistence of pesticides in plant	13
2.1.3. Persistence of pesticides in water	15
2.2. Fluazifop butyl	16
2.2.1. Degradation of Fluazifop butyl in soil	16
2.2.2. Persistence of pesticides in plant	19
2.2.3. Persistence of pesticides in water	19
3. MATERIALS AND METHODS	20
3.1. Materials	20
3.1.1. Pesticides	20
3.1.1.1. Ethoprophos	20
3.1.1.2. Fuzilade	21
3.1.2. Soil	23
3.2.1. The pesticide field experiment	25
3.2.2. Samples from soils	26
3.2.3. Sampling of plant	26
3.2.4. Pesticide/herbicide extraction	26
3.2.4.1. Extraction from soil	26
3.2.4.2. Extraction from potato roots	27
3.2.5. Clean up procedure	28

3.2.5.1. Clean up of extracted ethoprophos	28
3.2.5.2. Clean up of extracted fluazifop-P-butyl	29
3.2.6. Quantitative determination of pesticide	30
3.2.6.1. Preparation of technical stock solution	30
3.2.6.2. Determinations of pesticides	30
3.2.6.3. Recovery percentage	32
3.3. Statistical analysis	33
4. RESULTS AND DISCUSSION	34
4.1. Ethoprophos	34
4.2. Fluazifop-p-butyl	54
5. SUMMARY	73
6. REFERENCES	76
7. ARABIC SUMMARY	--
