INTRODUCTION.....	1
REVIEW OF LITERATURE	3
MATERIAL AND METHODS	23
EXPERIMENTAL RESULTS	54
I- Isolation and identification of causal fungi.....	54
II- Pathogenicity test :.....	54
III- Laboratory experiments	57
1- Effect of different fungicides	57
A- On fungal growth	57
B- On spore or sclerotial germination.....	59
2- Enzyme activity.....	62
A- Production of pectulolytic and cellulolytic enzymes by <u>Trichothecium roseum</u> , <u>Fusarium</u> <u>moniliforme</u> and <u>Macrophomina phaseolina</u> and effect of different fungicides on their activity in fungal filtrate.....	62
B- Effect of different fungicides on the activity of polygalacturonase (PG) and cellulase (Cx) enzymes in tissues of bean hypocotyls.....	66
C- Effect of fungal filtrates on germination and length of radical roots of bean cultivars....	69
3- Fungal toxins(s).....	71
A- Effect of culture filtrates.....	71
x On production of wilt symptoms on tomato cuttings	71
x On bean seedlings	72
B- Isolation of crude toxin(s).....	74
C- Effect of toxin(s).....	79
x On bean seedlings	79
x On bean seed germination	81
4- Root exudates	84

	<u>Page</u>
5- Uptake and translocation of some systemic fungicides.....	90
A- Uptake of some systemic fungicides by bean seeds	90
B- Uptake and translocation of some systemic fungicides by bean seedlings	92
6- Effect of residual effect of fungicides in green pods collected from treated seeds in the same seasons ,.....	96
7- Effect of storage period on the persistence of different fungicides applied to seeds and viability of treated seeds.....	97
IV- Greenhouse experiments	102
1- Varietal reaction	102
2- Effect of different fungicides on disease severity and plant growth	105
3- Effect of bean size and treating with fungicides on percentage of germination, disease severity and plant growth.....	112
V- Chemical constituents	115
A- Determination of sugars	115
B- Determination of phenolic compounds	119
C- Determination of total free amino acids	223
VI- Field Experiments	125
DISCUSSION	129
SUMMARY	151
