INTRODUCTION	1
REVIEW OF LITERATURE	3
Causal organisms	3
Seed health testing	6
Hot-air treatment	10
Soil moisture and depth of sowing	11
Effect of growth regulators	12
Fertilization	13
Fungicides	15
MATERIALS AND METHODS	18
EXPERIMENTAL RESULTS	50
1. Isolation of the causal organisms	50
2. Pathogenicity tests	50
A) Seed health testing	54
1. Examination of ungerminated seeds	54
(Inspection of dry seed).....	54
2. Incubation tests	60
3. Germination test	63
4. The seedling symptom test	70
5. Isolation of fungi from seed parts	72
B) Laboratory studies	76
1. Effect of growth regulators on the linear growth of <u>F. oxysporum</u> f.sp. <u>cumini</u> and <u>F. solani</u>	76
2. Effect of hot-air treatment on seed mycoflora % germination and infected seedlings	79
3. Effect of adding different concentrations of fungicides to Csapek's medium on the linear growth (in mm) of <u>F.</u> <u>oxysporum</u> f.sp. <u>cumini</u> and <u>F. solani</u>	85

CONTENTS : Cont'd.

	<u>Page</u>
4. Effect of fungicidal treatment on seed-borne fungi, % germination and infected seedlings %..	88
C) Pot experiments	94
1. Effect of different intervals of watering, depth of sowing, and seedling rate on the incidence of infection with <u>F. oxysporum</u> f.sp. <u>cumini</u> , <u>F. solani</u> and seed borne diseases of the commercial cumini variety	94
2. Effect of soaking cumini seeds in different concentrations of two growth regulators on disease incidence, infection with <u>F. oxysporum</u> f.sp. <u>cumini</u> or <u>F. solani</u> and seed borne diseases	101
3. Effect of adding different levels of ammonium sulphate (N), calcium supersulphate (P) and potassium sulphate (K) on disease incidence of cumini plant	105
4. Effect of different fungicides on disease control	112
D) Field experiments	122
1. Effect of soaking cumini seeds in different concentrations of two growth regulators on disease severity and yield components	122
2. Effect of different levels of fertilizers on disease severity and yield components	127
3. Effect of different concentrations of fungicides on disease control and yield components	133
