MATERIALS AND METHODS.	
I. The experimental design.....	43
II. Rate of damage by some major insect pests attacking maize plants.....	43
II.1. Rate of infestation caused by <i>S.cretica</i> and <i>O.nubilalis</i>	43
II.2. Rate of damage caused by <i>S.littoralis</i> and <i>S.exigua</i>	44
II.3. Damage caused by aphids.....	44
II.3.a. Rate of infestation by aphids.....	44
II.3.b. Seasonal abundance of corn leaf aphid <i>R.maidis</i>	45
III. Survey of predators in maize fields and their abundance.....	46
IV. Survey of parasitoids and percentages of parasitism..	46
IV.1. Rate of parasitism by egg parasitoids.....	47
IV.1.a. Percentage of parasitism on <i>S.cretica</i> eggs by <i>platytelenomus hylas</i>	47
IV.1.b. Percentage of parasitism on <i>O.nubilalis</i> eggs by <i>Trichogramma evanescens</i>	47
IV.2. Rate of parasitism by larval parasitoids.....	48
IV.3. Rate of parasitism by pupal parasitoids.....	49
IV.4. Percentage of parasitism on the corn aphid.....	49
V. Studies on parasitoids on hibernating corn borer larvae infesting corn stalks.....	49
V.1. Rate of parasitism by <i>Bracon brevicornis</i> on the hibernating corn borer larvae <i>S.cretica</i> and <i>O.nubilalis</i>	49
V.2. Sex-ratio of <i>B.brevicornis</i>	50
VI. Haemolymph studies.....	50
VI.1. Rearing of hosts.....	50
VI.1.a. Rearing of <i>S.cretica</i>	50
VI.1.b. Rearing of <i>O.nubilalis</i>	50
VI.2. Rearing of parasitoid, <i>Bracon brevicornis</i> Wesm.....	50
VI.3. Test.....	51
VI.4. Total haemocyte counts (THCs).....	51

	Page
VI.5. Differential haemocyte counts (DHCs).....	52
VI.5.a. Qualitative analysis of blood haemocytes.....	53
VI.5.b. Quantitative analysis of blood haemocytes.....	53

RESULTS AND DISCUSSION.

I.	Rate of damage by some major insect pests attacking maize plants.....	54
I.1.	Rate of infestation caused by <i>S.cretica</i>	54
I.2.	Rate of infestation by <i>O.nubilalis</i>	57
I.3.	Rate of damage caused by <i>S.littoralis</i> and <i>S.exigua</i>	63
I.4.	Rate of infestation by aphids	63
II.	Entomophagous insects.....	69
II.1	Predators.....	69
1.1.	<i>Orius spp.</i>	69
1.2.	<i>Scymnus spp.</i>	71
1.3.	Ladybird beetles.....	73
1.3.a.	<i>Coccinela undecimpunctata</i>	73
1.3.b.	<i>Cydonia vicina nilotica</i>	74
1.3.c.	<i>Cydonia vicina isis</i>	75
1.3.d.	<i>Adonia variegata</i>	76
1.4.	<i>Chrysoperla carnea</i>	76
1.5.	<i>Paederas alfieri</i>	77
II.2.	Parasitoids.....	87
2.1.	Egg parasitoids.....	87
2.1.a.	<i>Platytelenomus hylas</i>	87
2.1.b.	<i>Trichogramma evanescens</i>	91
2.2.	Larval and pupal parasitoids.....	92
2.2.a.	On <i>S.cretica</i>	92
2.2.b.	On <i>O. nubilalis</i>	97
2.2.c.	Egg and larval parasitoids of <i>S.littoralis</i> and <i>S.exigua</i>	102
III.	Studies on parasitoids on hibernating corn borerlarvae infesting corn stalks.....	112
III.1.	Percentages of parasitism.....	112
III.2.	Sex ratio of <i>B.brevicornis</i>	113

	Page
IV. Physiological studing of the haemolyph of both active and hibernating healthy 6th. instar <i>S.cretica</i> and <i>O.nubilalis</i> larvae and those parasitized by <i>B.brevicornis</i>.....	117
IV.1. Determination of total haemocyte counts.(THCs).....	117
IV.2. Types of haemocytes.....	118
IV.3. Differential haemocyte counts.(DHCs).....	122
3.1. Qualitative analysis of haemocytes.....	122
3.2. Quantitative analysis of haemocytes.....	141
