

CONTENTS

	PAGE
I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	4
2.1. Chemical and physical properties of phosphine	4
2.2. Toxicity of phosphine to insects.....	6
2.3. Insect resistance to phosphine	18
2.4. Test insects.....	47
2.4.1. <u>Tribolium castaneum</u> (Herbst).....	47
2.4.2. <u>Sitophilus oryzae</u> (L.).....	49
III. MATERIALS AND METHODS.....	51
3.1. Rearing of insects.....	51
3.2. Generation of phosphine.....	51
3.3. Measuring of phosphine concentrations.....	52
3.4. Pre-fumigation procedure.....	52
3.5. Fumigation procedure.....	52
3.6. Post-fumigation procedure.....	53
3.7. Selection procedure.....	53
3.8. Description of test insects.....	55
3.8.1. The red flour beetle (<u>T. castaneum</u> (Herbst), Coleoptera, Tenebrionidae.....	55
3.8.2. The rice weevil (<u>S. oryzae</u> L.), Coleoptera, Curculionide.....	56

	PAGE
3.9. Biological studies.....	57
3.9.1. Effect of selection pressure for phosphine on some biological parameters of <u>T.</u> <u>castaneum</u>	57
3.9.1.1. Number of eggs.....	58
3.9.1.2. The incubation period and the develop- mental span.....	58
3.10. Statistical analysis	59
IV. RESULTS AND DISCUSSION.....	60
4.1. Toxicity of phosphine to adults of (<u>T.</u> <u>castaneum</u> , Herbst).....	60
4.2. Laboratory selection of (<u>T. castaneum</u>) adults for resistance to phosphine.....	60
4.3. Susceptibility of some field strains of <u>T.</u> <u>castaneum</u> (Herbst) and <u>S. oryzae</u> (L.) collected from different Governorates in Egypt to phosphine.....	74
4.3.1. <u>T. castaneum</u>	74
4.3.2. <u>S. oryzae</u>	75
4.4. The biological characteristics of the phosphine-selection strain (F_4) of <u>T. castaneum</u> (Herbst).....	95
V. SUMMARY.....	105
VI. REFERENCES.....	108
VII. ARABIC SUMMARY.....
