1. INTRODUCTION	1
2. REVIEW OF LITERATURE	2
2.1. Soil content of organic matter	2
2.1.1. Soil organic matter content as affected by organic manuring	2
2.1.2. Organic manure as a source of plant nutrients..	3
2.2. Effect of organic manuring on the availability of some macronutrients	4
2.2.1. Soil nitrogen	4
2.2.2. Soil phosphorus	6
2.2.3. Soil Potassium	7
2.3. Effect of organic manuring on nutrients uptake	7
2.3.1. Nitrogen	7
2.3.2. Phosphorus	8
2.3.3. Potassium	9
2.3.4. Manganese	10
2.3.5. Iron	11
2.3.6. Zinc	12
2.4. Effect of organic manure on plant growth	12
2.5. Effect of mineral fertilization on plant growth and its nutrients utilization	14
2.5.1. Effect of mineral fertilization on plant growth	14
2.5.2. Effect of mineral fertilization on nutrients utilization	15
3. MATERIALS AND METHODS	18
3.1 Materials	18
3.1.1. Soils	18
3.1.2. Organic manures	18
3.2. Field experiment	18
3.3. Methods of analyses	22
3.3.1. soil analyses	22
3.3.2. Organic conditioners analyses	23
3.3.3. Plants analyses	23

4. RESULTS AND DISCUSSION	24
4.1. Effect of the different fertilization treatments on dry matter weight of tomato plant at the first stage of growth	24
4.2. Effect of different fertilization treatments on values of total macro and micronutrients content in the different organs	28
4.2.1. Contents of the macronutrients. N, P and K	28
4.2.1.1. roots content	28
4.2.1.2. Shoots content	30
4.2.1.3. Fruits content	31
4.2.2. Contents of the micronutrients Z, Mn and Fe	33
4.2.2.1. Roots content	33
4.2.2.2. Shoots content	35
4.2.2.3. Fruits content	38
4.3. Effect of different fertilization treatments on dry matter weight of tomato plant at the second stage of growth	41
4.4. Effect of different fertilization treatments on values of total macro and micro-nutrients content in different organs of tomato plants at the second stage of growth	44
4.4.1. Contents of the macronutrients N, P and K	44
4.4.2. Contents of the micronutrients Zn, Mn and Fe ..	46
6. SUMMARY	51
7. REFERENCES	54
ARABIC SUMMARY	

LIST OF TABLES

Table	Page
1 Some physical and chemical properties of the studied soil	19
2 Some chemical analyses of the tested organic materials	20
3 Effect of different composting materials as well as NPK on dry matter weight of tomato plants "different organs" (kg/fed.) at the first stage of growth (flowering) 55 days of sowing	25
4 Effect of different composting materials as well as chicken manure on total macro-nutrients content in tomato plants at the first stage of growth	29
5 Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato roots at the first stage	34
6 Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato shoots at the first stage	36
7 Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato fruits at the first stage	39
8 Effect of different composting materials on dry weights (kg/fed.) of tomato plants at the second stage (three months of sowing)	42
9 Effect of different composting materials on total macronutrients content in tomato plants at the second stage	45

Table		Page
10	Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato roots at the second stage	48
11	Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato shoots at the second stage	49
12	Effect of different composting materials on total micronutrients content (mg kg^{-1}) in tomato fruits at the second stage	50
