	INTRODUCTION	1
1.	REVIEW OF LITERATURE	2
1.1.	Salt-affected soils	2
1.2.	Irrigation water	2
1.2.1.	Suitability	2
1.2.2.	Classification.....	4
1.2.3.	Leaching requirements.....	6
1.3.	Micronutrients in soils of Egyptian.....	8
1.4.	Status of micronutrients under saline conditions.....	10
1.5.	Factors affecting the availability of micronutrients in the soils.....	14
1.5.1.	Soil reaction.....	14
1.5.2.	Calcium carbonate content.....	15
1.5.3.	Soil texture.....	16
1.5.4.	Organic matter content.....	17
1.6.	Effect of salinity on dry weight and micronutrient in the plants.....	18
2.	MATERIALS AND METHODS	24
2.1.	The Survey studies.....	24
2.2.	The Experimental studies.....	26
2.2.1.	Greenhouse Experiment 1:.....	26
2.2.2.	Greenhouse Experiment 2.....	27
2.2.3.	Greenhouse Experiment 3.....	32
2.3.	Methods of analysis and analytical procedures.....	36

2.3.1.	Soil analysis.....	36
2.3.2.	Water analysis.....	36
2.3.3.	Analysis of plant samples and the organic matter (Biogas manure)....	36
2.3.4.	Statistical analysis.....	36
3.	RESULTS AND DISCUSSIONS.....	37
3.1.	Survey studies on soil micronutrients in relation to soil salinity.....	37
3.1.1.	Available micronutrients in soil.....	37
3.1.2.	Micronutrients in crops.....	43
3.2.	Greenhouse Experiment 1: Effect of saline irrigation water on micronutrients in soil and plant.....	46
3.2.5.	Effect of saline irrigation water on dry weight of sorghum plants.....	51
3.2.6.	Effect of saline irrigation water on micronutrients in sorghum plants...	51
3.3.	Greenhouse Experiment 2: Effect of soil salinity on micronutrients in soil and plant	59
3.3.5.	Effect of soil salinity on dry weight of sorghum plants.....	64
3.3.6.	Effect of soil salinity on micronutrients of sorghum plants.....	66
3.4.	Greenhouse Experiment 3: Effect of irrigation with saline agricultural drainage water applied with different leaching regimes on (a) micronutrients in soil (b) plant growth (c) micronutrients in plant , and in leachates.....	73
3.4.5.	Plant growth (weight of barley plants).....	80
