- INTRODUCTION	1
- REVIEW OF LITERATURE	3
1- Polysaccharides	4
1.1-Skeletal polysaccharides	5
1.1.1.- Cellulose... ..	7
1.1.2 - Hemicellulose... ..	13
1.1.2.1-Xylans.. ..	13
1.1.2.2-Acidic hemicellulose	17
1.1.2.3- Mannans	18
1.1.2.4- Glucomannans and galactomannans ...	19
1.1.2.5- Polysaccharides containing galactose and arabinose.. ..	20
1.1.2.6- L-rhamnose and other sugars.. ..	24
1.2- Reserve polysaccharides.	24
1.2.1- Starch	27
1.2.2- Amylopectin and glycogen ...	29
2- Leguminous seed polysaccharides	31
3- General methods of structural identifi- cation of polysaccharides	38
3.1- Isolation and purification	38
3.2- Identification of polysaccharide components	43
3.2- Methylation analysis.. ..	45
3.3.1-Estimation of the completeness of methylation.. ..	47
3.3.2-Hydrolysis of the methylated polysaccharide	48

3.3.3- Separation and identification of methylated products	50
3.4- The use of periodate oxidation in structural carbohydrate chemistry...	54
3.5- Molecular size and shape of polysa- ccharides	59
3.6- Infrared spectra of carbohydrate ...	61
- MATERIALS AND METHODS	63
1- Isolation of the polysaccharide	64
2- Purification of the polysaccharide	67
3- Hydrolysis of the polysaccharide and identification of the product	68
4- Quantitative analysis of the component of the hydrolysate	69
5- The methylation of the polysaccharide ...	70
6- Estimation of completeness of the methyl- ation	71
7- Hydrolysis of methylated polysaccharide..	72
8- Separation of hydrolysate	72
9- Determination of carbo and hydrogen in the methylated	74
- RESULTS AND DISCUSSION	75
- SUMMARY	99
