

INTRODUCTION.....	1
1. REVIEW OF LITERATURE.....	3
1.1. Factors Affecting the Production of L-Asparaginase: -	3
1.1.1. Nutritional Factors: -	3
1.1.2. Environmental Conditions: -	6
1.2. Factors Affecting L-Asparaginase Activity: -	7
1.2.1. Effect of pH: -	7
1.2.2. Effect of Temperature: -	8
1.2.3. Effect of Substrate: -	8
1.2.4. Effect of Activators and Inhibitors: -	9
2. MATERIALS AND METHODS.....	12
2.1. Isolation of Brown-Pigmented Streptomycetes: -	12
2.2. Maintenance of the Cultures: -	12
2.3. Media Used: -	12
2.4. Fermentation Procedure: -	17
2.5. Enzyme Preparation: -	18
2.6. Assay of Asparaginase: -	18
2.7. Determination of pH Value: -	19
2.8. Determination of Protein: -	19
2.9. Study of the Morphological and Physiological Characteristics of the Selected Isolate (FS-39): -	20
2.10. Identification of the Selected Isolate FS-39: -	21
2.11. Factors Affecting L-Asparaginase Production by <i>Streptomyces phaeochromogenes</i> FS-39: -	22
2.12. Purification of L-Asparaginase of <i>Streptomyces phaeochromogenes</i> FS-39: -	22
2.12.1. Precipitation: -	22
2.12.2. Dialysis: -	23
2.12.3. DEAE-Cellulose Chromatography: -	23
2.12.4. Gel Filtration With Sephadex G-200: -	24
2.13. Physiological Properties of the Purified Enzyme:	25
2.13.1. Effect of Temperature on Activity: -	25
2.13.2. Effect of Temperature on the Stability of Enzyme: -	25
2.13.3. pH Activity Profile of the Purified Enzyme: -	25

2.13.4. pH Stability of the Purified Enzyme: -	26
2.13.5. Stability of Enzyme When Stored at 2°C, 4°C and 20-40°C: -	26
2.13.6. Effect of Some Metal Ions and Some Inhibitors on Enzyme Activity: -	26
3. RESULTS AND DISCUSSION	27
3.1. Taxonomy of the Most Active Streptomyces Isolate: -	28
3.2. Effect of Nutritional Factors on L-Asparaginase Production by <i>Streptomyces</i> <i>phaeochromogenes</i> : -	29
3.2.1. Effect of Different Concentration of L-Asparaginase: -	29
3.2.2. Effect of Different Carbon Sources: -	29
3.2.3. Effect of Different Nitrogen Sources: -	30
3.2.4. Effect of Omission of Different Minerals From Glycerol- L-Asparagine-Yeast Extract Medium: -	31
3.2.5. Effect of Addition of Different Concentration of Yeast Extract: -	32
3.3. Effect of Environmental Factors on L-Asparaginase Production by <i>Streptomyces</i> <i>phaeochromogenes</i> FS-39: -	33
3.3.1. Effect of Different Initial pH: -	33
3.3.2. Effect of Incubation Temperature: -	34
3.3.3. Effect of Different age and size of Inoculum: -	34
3.4. Purification of L-Asparaginase: -	34
3.5. Characterization of L-Asparaginase: -	36
3.5.1. Effect of Temperature and Thermal Stability on Enzyme Activity: -	36
3.5.2. Effect of pH on the Enzyme Activity and Stability: -	38
3.5.3. Stability of the Enzyme When Stored at 4°C and 20-40°C (lab. temperature): - ..	38
3.5.4. Effect of Some Metal Ions and Some Inhibitors on Enzyme Activities: -	39
