	Page
<b>I. INTRODUCTION</b>	1
<b>II. REVIEW OF LITERATURE</b>	3
II.1. Definition and nutrition important of dietary fiber .	3
II.2. Dietary fiber as a protective factor against certain diseases .	7
II.3. Dietary fiber content in different sources .	10
II.4. Nutritional considerations .	14
II.5. Corn cobs and carrot roots powders as a source of dietary fiber.	17
II.6. Effect of fiber on rheological properties of dough .	21
II.7. Effect of ascorbic acid ( as improver ) on bread quality.	27
<b>III. MATERIALS AND METHODS</b>	31
III.1. Materials .	31
III.2. Methods .	31
III.2.1. Physical and chemical characteristics .	31
III.2.1.1. Moisture content .	31
III.2.1.2. Ash content .	31
III.2.1.3. Proteins .	32
III.2.1.4. Lipids .	32
III.2.1.5. Total sugars content .	32
III.2.1.6. Total starch content .	32
III.2.1.7. Phytate content .	32
III.2.1.8. $\beta$ -carotene content .	33
III.2.1.9. Dietary fiber composition .	33
III.2.1.10. Ascorbic acid .	35
III.2.1.11 Chemical composition of the mixture .	36

	Page
<b>IV.2. The effect of replacing wheat flour (72% extraction) by corn cobs powder or carrot roots powder on its mixture chemical composition .</b>	48
<b>IV.2.1. The effect of replacing wheat flour (72% extraction) by corn cobs powder on its mixture chemical composition .</b>	48
<b>IV.2.2. The effect of replacing wheat flour (72% extraction) by carrot roots powder on its mixture chemical composition .</b>	48
<b>IV.3. Falling number ( Alpha – amylase activity ) .</b>	50
<b>IV.4. The effect of replacing wheat flour (72% extraction) by corn cobs powder or carrot roots powder on its rheological properties .</b>	53
<b>IV.4.1. The Farinograph properties .</b>	53
<b>IV.4.2. The extensograph properties .</b>	58
<b>IV.5. Organolyptic evaluation of balady and toast breads .</b>	62
<b>IV.5.1. Balady bread produced from wheat flour (72% extraction) with corn cobs or carrot powder .</b>	62
<b>IV.5.2. Toast bread produced from wheat flour (72% extraction) with corn cobs or carrot roots powders.</b>	69
<b>IV.6. Improvement of high fiber bread quality .</b>	71
<b>IV.6.1. Effect of L-ascorbic acid addition on the rheological (Farinograph and extensograph ) properties .</b>	71
<b>IV.6.2. Effect of L-ascorbic acid addition on the bread quality and sensory evaluation.</b>	72
<b>V. Summary</b>	85
<b>VI. Reference</b>	90
<b>Arabic Summary</b>	113
