1-Introduction	I
2-Review of literature	2
2.1. The physical and chemical character of the carbaryl	2
2.1.1. Absorption of carbaryl	5
2.1.2. Metabolism and fine of carbaryl	6
2.1.3. Inhibition and reactivation of acetyl choline esterase	7
2.2. Toxic effects of carbaryl	8
2.2.1. Biochemical effects of carbaryl toxicity	II
2.2.1.1. Effect of carbaryl toxicity on serum liver enzymes	11
2.2.1.2 Effect of carbaryl toxicity on blood glucose	
2.2.1.3 Effect of carbaryl toxicity on serum protein	13
2.2.1.4 Effect of carbaryl toxicity on serum lipids	14
2.2.1.5 [died of carbaryl toxicity on kidney functions	15
2.2.2. Effect of carbaryl toxicity on the tissues	16
2.2.3. Effect of carbaryl toxicity on blood coagulation system	18
2.2.4. I fleet of carbaryl toxicity on reproduction	18
2.3. Pathological changes associated with carbaryl toxicity	
2.3.1. Postmortem findings	21

2.3.2. Histopathology	
2.4. Residues of carbaryl	26
3-Materials and Methods	28
3.1. Materials	
3.3. Methods	31
3.3.1. Estimation of the LD ₅₀ of carbaryl	31
3.3.2. Preparation of carbaryl insecticide	32
3.3.3. Serum chemical assay	
3.3.4. Haematological assay	34
3.3.5. Methods used for epididymal spermatozoa examination	35
3.3.6. Statistical analysis	36
3.3.7. Histopathological studies	37
4-Results and Discussion	38
4.1. Clinical symptoms	38
4.2. Effect of carbaryl on body weight and organ weights	38
4.3. Serum biochemical responses	40
4.3.1. Effect on serum liver enzymes activity	40
4.3.2. Effect on serum bilirubin	41
4.3.3. Effect on kidney function tests	41
4.3.4. Effect on serum uric acid	43

III

4.3.5. Effect on serum electrolytes	44
4.3.6. Effect on serum total lipids and cholesterol	
4.3.7. Effect on serum glucose	
4.3.8. Effect on serum cholinesterase activity	48
4.3.9. Effect on serum protein and albumin	48
4.4.1 Hematological changes	50
4.5. Male fertility and reproductive system parameter changes	53
4.6. 1...., D ₅₀	55
4.7. Postmortem changes	56
4.8. Histopathological findings	56
Summary	65
