INTRODUCTION	1
REVIEW OF LITERATURE.....	5
Cd or Pb toxicity and its natural occurrence.....	5
Phytoavailability of Cd or Pb.....	8
Effect of Cd and Pb on growth criteria.....	10
Effect of Cd and Pb on sugar	18
Effect of Cd and Pb on minerals	19
Effect of Cd and Pb on yield.....	21
Effect of growth regulators on growth criteria.....	22
Effect of growth regulators on yield.....	25
Material and Methods.....	27
Procedure of soil and water analysis.....	27
Growth regulating substances used.....	30
Heavy metal salt used.....	30
The used methods of growth regulators and the tested heavy metals application to sugar beet plants.....	31
The variety of sugar beet used.....	31
Methods of planting seeds and the conditions of growing plants.....	31
Planting of experimental trials.....	32
Plant sampling procedures	33
Growth parameters measurements.....	34
Chemical analysis methods.....	35
RESULTS AND DISCUSSION.....	36
Morphological measurement.....	36
Ratio between root diameter / root length.....	48
Absolute actual amounts of fresh and dry weights... ..	51
Percentage distribution of dry matter in root.....	67
Leaf area ratio (LAR), leaf weight ratio (LWR) and specific leaf area (SLA) during different periods of growth.....	74

Plant organ water relations.....	78
Photosynthetic pigments concentration.....	85
Status of sugars.....	90
Specific nutrient concentration.....	96
Quality and yields.....	114
CONCLUSION AND SUMMARY.....	124
REFERENCES.....	132
ARABIC SUMMARY
