INTRODUCTION	1
REVIEW OF LITERATURE	3
MATERIALS AND METHODS	29
EXPERIMENTAL RESULTS	47
1. Isolation and identification of strawberry root rot fungi	47
1.1. Isolation from naturally infected strawberry roots	47
1.2. Isolation from frigo strawberry transplant roots after planting	48
2. Pathogenicity tests and Inoculum levels	49
3. Varietal reaction against tested pathogenic root rot fungi	51
4. In Vitro studies	53
4.1. Effect of some abiotic and biotic inducers on growth of tested root rot fungi	53
4.2. Effect of some abiotic and biotic inducers on growth of germination of fungal propagules.	58
4.3. fungal oxidative enzymes in mycelial and culture filtrates of the tested pathogenic fungi <i>in vitro</i> .	60
5. Greenhouse studies:	61
5.1. Effect of abiotic and biotic inducers on the disease incidence	62
5.2. Effect of abiotic and biotic inducers on some growth parameters of strawberry plants	66
5.2.1. Shoot and root lengths	66
5.2.2. Fresh weight of shoots and roots	69
5.2.3. Dry weights (DW) of shoots and roots	71
5.2.4. Percentage of dry matter in shoots and roots	75
5.3. Abiotic and biotic-associated bio-chemical changes in plants.	78
5.3.1. Sugars content	78
5.3.2. Phenol content	83

5.3.3. Total free amino acids content	88
5.3.3.1. Quantitative determination	88
5.3.3.2. Qualitative determination	
5.4. Effect of abiotic and biotic inducers on lignin content in roots of strawberry plants.	93
5.5. Effect of abiotic and biotic inducers on salicylic acid on phytoalexin contents.	95
5.6. Effect of abiotic and biotic treatments on activities of oxidative enzymes in plants.	96
5.6.1. Peroxidase enzyme	96
5.6.2. Poly phenol oxidase enzyme	99
5.6.3. Chitinase (CHT) enzyme	101
5.6.4. β , 1-3-Gluconase enzyme	104
5.7. Effect of abiotic and biotic inducers on activities of some enzymes in cultivated soil around treated roots.	106
5.7.1. Dehydrogenase (DEH) enzyme	106
5.7.2. Cellulase enzyme	109
5.7.3. Phosphatase enzyme	112
5.8. Effect of abiotic and biotic inducers on biological activities in soil.	114
5.8.1. Total microbial count	114
5.8.2. Total count of soil fungi	117
5.8.3. Total count of bacteria	120
5.8.4. Total count of actinomycetes	123
5.8.5. Total count of Azotobacter	126
5.8.6. Total count of nitrifying bacteria	129
5.8.7. Total count of spore-forming bacteria	132
6. Effect of application method of some abiotic and biotic inducers under field conditions.	135
6.1. Effect on percentage of dead plants.	135
6.2. Effect on fruit yield	137
DISCUSSION	139
SUMMARY	151
