I. INTRODUCTION	 1
2. REVIEW OF LITERATURE	 4
2.1. Biogas technology and the environmental factors affecting biogas process.	 4
2.2. Biogas manure.	 10
2.3. Effect of organic manuring on soil microorganisms.	 14
2.4. Decomposition of organic manures and their effects on soil chemical properties.	 43
3. MATERIALS AND METHODS	 52
3.1. Materials	 52
3.1.1. Cow dung	 52
3.1.2. Sewage water	 52
3.1.3. Farmyard manure	 52
3.1.4. Soils	 55
3.2. Experimental Procedures	 55
3.2.1. Evaluation of biogas and organic manure production from different organic wastes under anaerobic conditions.	 55
3.2.2. Enzymatic activities and microbial densities in soil.	 61
3.3. Methods	 62
3.3.1. Gas determinations	 62
3.3.1.1. Measurements of gas yield	 62
3.3.1.2. Methane content	 63
3.3.1.3. Carbon dioxide	 64
3.3.2. Chemical analysis	 64
3.3.2.1. Hydrogen ion concentration	 64
3.3.2.2. Total solids	 65
3.3.2.3. Volatile solids	 65

	<u>Page</u>
3.3.2.4. Organic carbon	65
3.3.2.5. Total nitrogen	65
3.3.2.6. Soluble nitrogen	66
3.3.2.7. Total phosphorus	66
3.3.3. Microbiological examinations	66
3.3.3.1. Media used	66
3.3.3.1.1. Soil extract agar media	66
3.3.3.1.2. Rose-bengal streptomycin agar.	67
3.3.3.1.3. Jensen's medium	68
3.3.3.1.4. Dubos medium	68
3.3.3.1.5. Omeliansky's medium	69
3.3.3.1.6. MacConkey's bile salts agar medium.	69
3.3.3.1.7. Salmonella and Shigella agar medium.	70
3.3.3.2. Procedures for microbial determination.	70
3.3.3.2.1. Total count of bacteria, fungi and actinomycetes.....	70
3.3.3.2.2. Aerobic cellulose de- composers.	71
3.3.3.2.3. Anaerobic cellulose decomposers.	71
3.3.3.2.4. Coliform group	71
3.3.3.2.5. Salmonella and Shigella	71
3.3.4. Enzyme assay	72
3.3.4.1. Dehydrogenase	72
3.3.4.2. Phosphatase (Nuclease)	73
3.3.4.3. Urease	74
3.3.4.4. Nitrogenase	74
4. RESULTS AND DISCUSSION	77
4.1. Production of biogas and organic manure.	77
4.2. Effect of organic manures on the density of microorganisms.	93

	<u>Page</u>
4.2.1. Total bacterial count.	 93
4.2.2. Actinomycetes	 98
4.2.3. Fungi	 101
4.2.4. Aerobic cellulose decomposers	 106
4.2.5. Anaerobic cellulose decomposers	 109
4.2.6. Coliform group	 114
4.2.7. Salmonella and Shigella	 117
4.3. Enzymatic activities	 118
4.3.1. Dehydrogenase	 118
4.3.2. Phosphatase (Nuclease)	 124
4.3.3. Urease	 131
4.3.4. Nitrogenase	 138
4.4. Chemical properties of soil	 145
4.4.1. Organic carbon	 146
4.4.2. Total nitrogen	 148
4.4.3. C:N ratio	 149
4.4.4. Soluble nitrogen	 154
