I- INTRODUCTION	1
II- REVIEW OF LITERATURE	5
III- MATERIAL AND METHODS	32
IV- RESULTS	44
I- Screening of Yeasts	44
I.1- Growth measurements (Growth rates)	44
I.1.1- Sporulation ability of <i>Pichia stipitis</i> strain	46
I.1.2- Mutation Induction and Mutants Isolation	47
I.1.3- Identification of <i>Pichia stipitis</i> auxotrophic mutants	49
I.1.4- Sugar fermentation efficiency measured as sugar consumption	50
I.2- Induction of yeast protoplasts	51
I.2.1- Protoplast fusion	54
I.2.2- Sugar consumption in hybrid fusants	57
I.2.3- Determination of ethanol production	59
I.2.4- Growth behaviour of the selected fusants and their parental yeast strains on different carbon sources	64
I.3- DISCUSSION	67
II- Mutation induction	68
II.1 - Protoplast formation	69
II.2 - Protoplast (spheroplast) fusion	70
II.3 - Determination of ethanol production	73
III- Growth behaviour of the selected fusants and its parental yeast strains on different carbon sources	75
