

CONTENTS

	Page
I-INTRODUCTION	1
II-REVIEW OF LITERATURE	4
1. Effects of abiotic stresses and plant defence mechanisms	4
2. Glutathione S-transferase as free radical scavenging enzymes	11
3. Improvement of abiotic stress tolerance in plants using gene transfer	17
4. Wheat transformation	24
4.1. Biolistic transformation in wheat	24
4.2. Other transformation methods in wheat	37
III- MATERIALS AND METHODS	43
1. Materials	43
1.1. Plant material	43
1.2. Plant expression vector	43
2. Methods	44
2.1. Gene construction	45
2.1.1. Enzymatic digestion conditions	45
2.1.2. Liagation	45
2.1.3. Introduction of plasmid DNA into <i>E. coli</i> competent cells	45
2.1.3.1. Preparation of competent cells	45
2.1.3.2. Transformation of competent cells with DNA plasmid	47
2.1.4. Plasmid isolation and confirmation of construction	47
2.1.4.1. Mini preparation of the plasmid	48
2.1.4.2. Agarose gel electrophoresis	50
2.1.4.3. Maxiprep of the plasmid construct	52
2.1.4.4. Plasmid confirmation	55
2.1.4.5. Determination of DNA concentration	55
2.2. Wheat transformation and regeneration	55
2.2.1. Surface sterilization of seeds	56
2.2.2. Excision of immature embryos and callus Initiation	56
2.2.3. Osmotic treatment	57
2.2.4. Bombardment of immature embryo-derived callus	57
2.2.4.1. Preparation of microcarriers for bombardment	57
2.2.4.2. The gun conditions	58
2.2.4.3. Operation of the biolistic gun	59
2.2.4.4. Transformation experiments	60
2.2.5. Subculture of immature embryo-derived calli	61
2.2.6. Production of regenerated putatively-transgenic explants	61
2.2. Acclimatization procedure	62
2.3 Evaluatio of putative transgenic plants	63
2.3.1. Leaf painting with the herbicide basta	63
2.3.2. Molecular analysis	63

2.3.2.1. Molecular analysis on the structural level	63
2.3.2.1.1. Genomic DNA extraction	63
2.3.2.1.2. Polymerase chain reaction (PCR) analysis	64
2.3.2.1.3. Southern analysis	65
2.3.2.2. Molecular analysis at the functional level	71
2.3.2.2.1.Reverse transcriptase-polymerase chain reaction (RT-PCR) analysis	71
IV- RESULTS AND DISCUSSION	75
1. Plant expression vector construction	75
2. Wheat transformation using immature embryos-derived calli	79
2.1. Callus induction and transformation	80
2.2. Regeneration of bombarded cells	86
2.3. Rooting and acclimatization	87
3. Evaluation of putative transgenic plants	87
3.2. Molecular analysis	88
3.2.1. Molecular analysis on the structural level	88
3.2.1.1. Polymerase chain reaction (PCR) analysis and PCR/Southern	88
3.2.2. Molecular analysis on the functional level	94
3.2.2.1.Reverse transcriptase-polymerase chain reaction (RT-PCR) analysis	94
V- SUMMARY	98
