INTRODUCTION	1
REVIEW OF LITERATURE	4
 Effect of gamma rays	
II.1.a. on some economic characters of wheat and barley.	5
II.1.b. on mitotic and meiotic cell divisions	12
II.1.c. on DNA contents during cell cycle	16
 Effect of ethylene imine	
II.2.a. on some economic characters of wheat and barley.	23
II.2.b. on DNA contents during cell cycle	24
III.3. Effect of salinity on grains of wheat and barley germination	25
II.4. Effect of salinity on yield performance of wheat and barley.	38
MATERIALS AND METHODS	45
RESULTS AND DISCUSSION	45
I. Effect of Salinity on the germination percentage of wheat and barley grain cultivars.	45
II. The mutagenic effect on the morphological characters and grain yield under saline conditions.	47
III. Cytological studies on the chromosomal abnormalities of meiosis, mitosis.	88
1. Cytological behaviour of chromosomes in mitosis	88
2. Cytological behaviour of chromosomes in meiosis	97
IV. DNA quantity in mitotic and meiotic cells during interphase	114
