I- INTRODUCTION	1
II- REVIEW OF LITERATURE	3
1- Pesticide Residues in Various Crops	3
2- Effect of Food Processing on Pesticide Residues	18
3- Monitoring of Pesticide Residues in Agricultural Products	21
III- MATERIALS AND METHODS	29
1- Insecticide Used	29
2- Insecticidal Application and Sampling	30
2.1- Vegetables	30
2.2- Fruits	31
3- Residue Determination	31
3.1- Preparation of the sample	31
4- Analytical Methods	32
4.1- Extraction	32
4.2- Clean-up	33
4.3- Chemoassay	34
IV- RESULTS AND DISCUSSION	36
1- Persistence of Malathion, Pirimiphos-methyl and Diazinon on and in Some Vegetables	36
1.1- Residues on and in tomato fruits	36
1.2- Residues on and in cucumber fruits	40
1.3- Residues on and in green pepper fruits	43
1.4- Residues on and in eggplant fruits	46
1.5- Residues on and in okra fruits	49
1.6- Residues on and in cabbage leaves	52
1.7- Residues on and in snap bean pods	57
2- Persistence of Malathion, Pirimiphos-methyl and Diazinon on and in Various Fruits	64
2.1- Malathion residues	65
2.2- Pirimiphos-methyl residues	78
2.3- Diazinon residues	80
3- Monitoring of Insecticide Residues in Some Agriculture Product	85
V- SUMMARY	105
VI- REFERENCES	109
VII- ARABIC SUMMARY.
