▪ Abstract	
• INTRODUCTION	1
• REVIEW OF LITERATURE :	
1. Efficacy of <i>B. thuringiensis</i> against <i>S. littoralis</i>	
larval instars	3
1-1- Laboratory studies	3
1-2- Field studies	7
2. Pathological effect of <i>B. thuringiensis</i> after	
expousre to sunlight with different additives	10
3. Haemolymph studies	15
3.1.Types of haemocytes	16
3.2.Total and differential haemocyte counts	20
4. Histological studies	22
• MATERIALS AND METHODS :	
1. Maintenance of <i>Spodoptera littoralis</i> (Boisd.) on	
castor – bean leaves	28
2. Bacterial products	29
3. Larval treatments with bactrial preparations.....	29
3.1. Effect on larval mortality	29
3.2. Effect on subsequent stages	30
4. Field studies (Artificial infestation)	31
5. Materials used for encapsulating <i>B. thuringiensis</i>	
spores against ultraviolet	32
5.1. Procedure	33
5.2.The used photoprotectants	33

5.3. Treatments against <i>S. littoralis</i>	34
5.3.A. Laboratory treatments.....	34
5.3.B. In the field	35
6. MVP Π	36
6.1. Biological studies	36
6.2. Effect of UV treatment	37
6.2.A. In the laboratory	37
6.2.B. In the field	38
7. Haemolymph studies	38
7.1. Treatments	38
7.2. Haemolymph inspections	38
7.2.A. Total haemocyte counts (THCs)	39
7.2.B. Differential haemocyte counts (DHCs)	39
8. Histological studies	40
8.1. Treatments	40
8.2. Histopathological studies on <i>S. littoralis</i> larvae after treatment by <i>B. thuringiensis</i> product.....	40
9. Statistical analysis	42

• **RESULTS AND DISCUSSTION:**

1. Laboratory evaluation of three <i>B. thuringiensis</i> products against different larval instars of <i>S. littoralis</i>.....	43
1.1. Effect on larval mortality	43
1.1.a. Newly hatched	43
1.1.b. Against 24h. old 1 st insatr larvae	47

1.1.c. Against 2 nd instar larvae	47
1.1.d. Against 3 rd larval instar of <i>S. littoralis</i>	50
1.1.e. Fourth larval instar treatments	50
1.1.f. Against 5 th instar larvae	53
1.1.g. Sixth instar larvae fed on treated food	53
1.2. Efficacy of <i>S. littoralis</i> survivals after	
feeding of different larval instars on LC₅₀ of	
<i>B. thuringiensis</i> products	57
1.2.a. Treatment of newly hatched larvae	57
1.2.b. Treatment of 24h. old 1 st instar larvae	63
1.2.c. Treatment of 2 nd instar larvae	67
1.2.d. Third instar larval treatments	72
1.2.e. Treatment of 4 th larval instar	76
1.2.f. Treatment of <i>S. littoralis</i> 5 th larval instar	79
1.2.g. Effect due to <i>S. littoralis</i> 6 th instar larval	
treatments.....	83
2. Efficacy of Dipel 2X on <i>S. littoralis</i> in the field.....	90
3. Evaluation on some materials as UV	
Photoprotectants for increasing the efficacy of	
<i>B. thuringiensis</i>	93
3.1. Laboratory studies	93
3.2. Field studies	100
3.2.a. Effect on larval , prepupal and pupal	
mortalities	105
3.2.b. Effect on larval and pupal durations.....	111
3.2.c. Effect on % malformations among the obtained	
<i>S. littoralis</i> pupae and adults	115
3.2.d. Effect of field treatment with bioinsecticide on	
<i>S. littoralis</i> fecundity and adults' longevity	116

3.2.e. Effect on the oviposition period	116
3.2.f. Effect on eggs' productivity and percentage hatching.....	120
3.2.g. Effect on adults' longevity	125
4. MVPΠ , a genetic engineer product of δ - endotoxin.....	128
4.1.Efficacy on mortalities among <i>S. littoralis</i> 1 st and 3 rd larval instars.....	128
4.2. Effect of <i>S. littoralis</i> 1 st and 3 rd instar larval treatment by the LC ₅₀ of MVPΠ on the survivors.....	132
4.3. Effect of MVPΠ exposure to UV	142
4.3.a. Laboratory experiment	142
4.3.b. Field experiment	142
5. Haemolymph studies	146
5.1. Determination of total haemocyte counte (THCs) in <i>S.littoralis</i> larvae treated with Dipel 2X.....	146
5.2. Types of haemocytes	149
5.3. Determination of the differntial haemocyte counts (DHCs)	149
5.3.1. Qualitative analysis of haemocytes of <i>S. littoralis</i> larvae	149
5.3.2. Quantitative analysis of haemocytes	172
6. Histopathological effect of Dipel 2X and MVPΠ on larval of <i>S. littoralis</i>	180
6.1. Histology of normal larvae	180
6.2. Histological effect of Dipel 2X on larvae of <i>S.</i>	

<i>littoralis</i>	180
6.3. Histological effect of MVPII on larvae of S.	
<i>Littoralis</i>	182
