INTRODUCTION	Page
REVIEW OF LITERATURE	1
1-Life Cycle of nematodes.	5
2- Insects Susceptibility to the nematodes.	5
3- Influence of mixing nematodes and pesticides on insect mortality.	6
4-Nematode dispersal and migration.	11
5-Field Applications of Entomopathogenic Nematodes Against Borer Insect of Fruit Trees.	19
MATERIAL AND METHODS	24
1- Rearing technique.	33
a- The greater wax moth, <i>Galleria mellonella</i> .	33
b- The black cut worm, <i>Agrotis ipsilon</i> .	33
c- The cotton leaf worm, <i>Spodoptera littoralis</i> .	34
2- Soil samples.	35
3- Isolation of entomopathogenic nematodes.	35
4- Chemical used.	36
5-Comparative effect between the entomopathogenic nematodes and the nematicides against <i>S. littoralis</i> and <i>A. ipsilon</i> in sand soil.	37
6- Effect of pesticides on nematodes activity.	39
7- Dispersal and migration of nematode species.	40
8- Field Experiments.	41
9-Statistical analysis.	44
RESULTS AND DISCUSSION	47
I-Laboratory studies	48
1-Effect of combination of pathogenic nematodes and nematicides on some stages of <i>Spodoptera littoralis</i> and <i>Agrotis ipsilon</i> .	48
a-Effect of combination on 6 <u>th</u> instar larvae.	48
b-Effect of combination on prepupae.	52
c-Effect of combinations on pupae.	54

	Page
2-Effect of some pesticides on the activity of <i>H. bacteriophora</i> dauer stages	60
3-Dispersal and migration of nematodes.	64
3.1-Comparison between the effect of <i>G. mellonella</i> and Nemacur.	64
3.2-Comparison between the effect of <i>S. littoralis</i> and Nemacur.	66
3.3-Effect of <i>S. littoralis</i> feces.	69
4.3 -The effect of host species.	69
II-Filed studies dealing with Biological control of <i>Zeuzera pyrina</i> and <i>Synanthedon myopaeformis</i> by nematodes.	76
a)-Effect of application method and nematode concentration on Insect morality	76
1-Effect of nematode concentration.	77
2-Effect of application method.	83
b)-Comparative effect of both entomopathogenic nematodes and pesticides.	85
c)-Comparative effect of both entomopathogenic nematodes and <i>Bacillus thuringiensis</i> in controlling <i>Z. pyrina</i> .	90
d)-Influence of temperature on infectivity of some pathogenic nematode strains.	93
SUMMARY	96
CONCLUSION & RECOMMENDATION	102
