

CONTENTS

	Page
1- Introduction	1
2- Review of literature	3
2-1 Potato	3
2.2 Organic Vegetable Production in Egypt	4
2.3 Effect of Macro-nutrients on Potato	5
2.4 Effect of Micro-nutrients on Potato	8
2.5 Effect of organic Fertilizer on Potato	13
2.6 Sources of organic matter	17
2.6.1– Plant residues	17
2.6.2– Animal manure	22
2.7- Composting processs.....	26
2.9- The importance factors effecting the compost process	34
2.9.1 Temperature	35
2.9.2 Composting microorganism	38
2.10 Composting accelerants	48
2.11 The importance of organic manure composting	50
2.12 Effect organic manure composting on soil organic matter	57
2.13 Isotope techniques for estimating crop N uptake ¹⁵N...	57
3- Material and Methods	66
4- Results and Discussion	78
4. 1- Composting Experiment :	
4.1.1- Changes of pH with time duration	78
4.1.2- Changes of EC with time	80
4.1. 3 - Nitrogen content in compost as affected by	

Treatments and time of incubation duration	82
4.1. 4 - Change of C/N ratio with time duration	85
4.1. 5-Organic matter content of composted materials...	87
4.1.6-Phosphorus content of composted materials.....	89
4.1. 7-Potassium content of compost as effected by different treatment along with incubation period ...	91
4.1.8-Micronutrients in compost	93
4.2-Field Experiment.....	101
4.2.1- Effect of compost treatments on shoot dry matter of potato varieties.....	101
4.2.2-Nutrients uptake by potato varieties	114
4.2.3-Starch accumulation in potato tubers	130
4.2.4-Nitrate accumulation in tubers of potato varieties...	137
4.3 - Application of ¹⁵N isotope dilution technique.....	141
4.3.1- Nitrogen derived from fertilizer (%Ndff)	141
4.3.2- Nitrogen derived from organic compost (% Ndf comp)	146
4.3.3- Nitrogen derived from soil (% Ndffs)	150
4.3.4- Fertilizer use efficiency (% FUE)	154
4.3.5- ¹⁵N recovered by potatoes	160
5- Summary and conclusion	165
6- References	173
7- Arabic summary
