<i>Abstract</i>	I
<i>Acknowledgement</i>	III
<i>Contents</i>	IV
<i>List of figures</i>	IX
Chapter 1: Theoretical background and literature survey	
1.1- Introduction.	1
1.2. Literature survey:	2
1.2.1. Feature recognition and design by feature	3
1.2.1.1 Feature recognition techniques and applied models:	3
1.2.2 Process planning:	8
1.2.2.1 Survey of CAPP systems:	9
1.2.3 Part programming:	20
1.2.3.1 Survey of computer aided part programming systems:	20
1.3. Statement of the problem:	24
1.4. Aim of present work	24
1.5. Scope of present work	25
1.6. Organization of the thesis	25
Chapter (2): Feature Recognition	
2.1- Introduction.	26
2.2 Data extraction	27
2.2.1. Extraction data from DXF file	27
2.2.1.1. Elevation and plan views separation technique	27
2.2.1.2. Data transformation from (X-Y) to (X-Z) module	28
2.2.1.3. Drawing limitations reduction	28
2.2.1.4. Extraction of the start and end point of an arc	28
2.2.1.5. Shifting data to origin	30
2.2.2. Extraction data from IGS file	32
2.2.2.1. Determination of sketched plane	32
2.2.2.2- Extraction of the start and end point of an arc	33
2.2.2.3 Shifting data to origin	34
2.3. Feature recognition module	35
2.3.1 output of reading module (input)	37
2.3.2 features building (processing)	37

2.3.2.1 Using DXF file	38
Recognition of normal external contour	38
Recognition of External circular contours	40
Recognition of internal contours	41
Recognition of rectangular pockets	42
Recognition of Slots	44
Recognition of holes	44
Holes on pitch circle recognition	46
Row of holes recognition module	47
Recognition of circular pockets	48
Chamfer recognition module	49
2.3.2.2. Using IGS file	50
Recognition of normal external contour	50
Recognition of External circular contours	52
Recognition of internal contours	53
Recognition of rectangular pockets and slots	54
Recognition of holes	56
Holes on pitch circle recognition	58
Row of holes recognition module	59
Recognition of circular pockets	59
2.3.2.3 Feature recognition of CNC part programming	60
External polar contour recognition module	60
Mirror recognition module	61
Recognition of scaled contours	62
Mirror of two group of holes on pitch circle	62
Mirrored and scaled contours	63
Chapter (3) :Computer aided operation planning	
3.1. Introduction	64
3.2. Database module	64
3.2.1 Machine tool database	64
3.2.2. Tooling database	67
3.2.3. Workpiece material database	70
3.3. Fixation feature module	72
3.3.1. Rules for choosing fixation features	72
3.4. Operation planning module	73

3.5. Executed procedures within software to perform operation planning	73
3.5.1. Selection of used machine	73
3.5.2. Selection of the workpiece material	73
3.5.3. Optimization of using tools	73
3.6. Case study for the operation planning module	74
3.6.1. Reading data by the software	75
3.6.2. Selection of the data file	75
3.6.3. Selection of operation planning	76
3.6.4. Display of results of extracted data	76
3.6.5. Machine selection	77
3.6.6. Workpiece material selection	78
3.6.7. Extraction of features	79
3.6.8. Display of operation sequence	80
3.6.8.1. Facing details	81
3.6.8.2. External contour details	81
3.6.8.3. Rectangular pocket details	82
3.6.8.4. Circular pocket details	82
3.6.8.5. Slot details:	83
3.6.8.6. Details of scattered hole:	83
3.6.8.7. Row of holes details	84
3.6.8.8. Group of holes on pitch circle details	84
Chapter (4) Computer aided part programming	
4.1 Introduction	86
4.1.1. CNC machine concept	87
4.1.2. CNC machine tool	87
4.1.3. CNC milling process	88
4.1.4. Part programming	88
4.1.4.1. Manual part programming	88
4.1.4.2. Computer aided part programming	89
4.2. Computer aided part programming module	92
4.2.1. Feature recognition for using advance code	92
4.2.2. Machine tool selection	92
4.2.3. Automatic part program generation	93
4.2.3.1. Safe line generation	93
4.2.3.2. Facing module	93

4.2.3.3. External contour module	99
4.2.3.3.1. General External Contour module	99
4.2.3.3. 2.circular contour module	102
4.2.3.3. 3.Polar contour module	104
4.2.3.3. 4.General mirrored contour module	106
4.2.3.3. 5.Scaled contour module	108
4.2.3.3. 6.Mirrored and scaled contour module	110
4.2.3.4. Internal contour module	113
4.2.3.4. 1.General internal contour module	113
4.2.3.4.2. Rectangular and squared pocket module	114
4.2.3.4.3. Circular pocket module	117
4.2.3.4.4. Slot module	118
4.2.3.5. Hole module	120
4.2.3.5.1. Same hole module	120
4.2.3.5.2. Flat ended holes module	121
4.2.3.5.3. Centering module	123
4.2.3.5.4. Conical ended holes module	124
4.2.3.5.5. Tapping module	126
4.2.3.5.6 Mirror of two groups of holes on two pitch circle module	128
4.2.3.6 Chamfering module	129
Chapter (5) Results and Discussions	
5.1 Operation Planning Case studies	130
Case study (1)	130
Case study (2)	131
Case study (3)	132
Case study (4)	132
Case study (5)	133
5.2. Part Program case studies using FANUC controller	134
Case study (1)	134
Case study (2)	141
Case study (3)	149
Case study (4)	156
Case study (5)	165
5.3. Part program case studies using Sinumerik controller	173
Case study (1)	173

Case study (2)	176
Case study (3)	178
Case study (4)	181
Case study (5)	185
Discussion	188
Chapter (6) Conclusion and future work	190
6.1 Conclusion	190
6.2 Future work	192
References	193
