

CONTENTS

1. INTRODUCTION.....	1
2. REVIEW OF LITERATURE.	4
2.1. Chemical characteristics of sewage sludge.....	4
2.2. Effect of sewage sludge application on soil heavy metal contents.	5
2.2.1. Nutritive heavy metals (Fe, Mn, Zn and Cu). .	5
2.2.2. Non-nutritive heavy metals (Pb and Cd).....	9
2.3. Effect of sewage sludge application on biological activity in ecosystem rhizosphere.....	11
2.3.1. CO ₂ in soil (soil respiration rate).....	12
2.3.2. Nitrogen fixation and nitrogenase activity.	14
2.4. Effect of sewage sludge application on soil pH and pathogenic bacteria.	17
2.4.1. Soil pH.....	17
2.4.2. Pathogenic bacteria.	18
2.5. Plant growth, macro-micronutrient and heavy metal contents in plant as affected by sewage sludge application.	20
2.5.1. Plant growth.....	20
2.5.2. NPK content in plant.....	22
2.5.3. Fe, Mn, Zn and Cu contents in plant.....	24
2.5.4. Pb and Cd contents in plant.	26
3. MATERIALS AND METHODS.....	28
3.1. Soil used in the study.....	28
3.2. Sewage sludge used in the study.....	28
3.3. Experimental work.	28

3.3.1. The first experiment.	31
3.3.2. The second experiment.....	32
3.4. Laboratory analyses.....	33
3.4.1. Soil analyses.	33
3.4.2. Plant material analyses.	34
3.4.3. Sewage sludge analyses.....	34
3.4.4. Biological activities determinations.....	35
3.4.4.1. Carbon dioxide output.....	35
3.4.4.2. Nitrogenase activity (C_2H_2 -reduction technique.....	36
3.4.5. Microbiological determinations.....	36
3.4.5.1. Media used.....	36
3.4.5.2. Procedures for bacteria count.	37
4. RESULTS AND DISCUSSION.	39
4.1. The chemical characteristics of sewage sludge.	39
4.2. Effect of sewage sludge application on soil pH in ecosystem rhizosphere.	40
4.3. Soil heavy metal contents as affected by sewage sludge application.	42
4.3.1. Nutritive heavy metals.....	42
4.3.1.1. Iron (Fe).....	42
4.3.1.2. Manganese (Mn).	44
4.3.1.3. Zinc (Zn).....	45
4.3.1.4. Copper (Cu).	47
4.3.2. Non-nutritive heavy metals.	48
4.3.2.1. Lead (Pb).	48
4.3.2.2. Cadmium (Cd).	50
4.4. Effect of sewage sludge application on biological activities in ecosystem of rhizosphere.	51

4.4.1. CO ₂ in soil (soil respiration rate) as an indicator for biological activity.....	51
4.4.2. Nitrogenase activity as an indicator for nitrogen fixation.....	53
4.5. Effect of sewage sludge application on the counts of pathogenic bacteria.....	56
4.5.1. Counts of <i>Coliform</i> group.....	56
4.5.2. Counts of <i>Salmonella</i> and <i>Shigella</i> group.....	58
4.6. Effect of sewage sludge application on plant growth and its content of macro-micronutrients and heavy metals.....	60
4.6.1. Effect of sewage sludge application on the growth of corn and faba-bean.....	60
4.6.2. NPK contents in plant.....	62
4.6.3. Nutritive and non-nutritive heavy metal contents in plant.....	65
4.6.3.1. Nutritive metals (Fe, Mn, Zn, Cu).....	65
4.6.3.2. Non-nutritive heavy metals (Pb and Cd)..	70
5. SUMMARY.....	73
6. REFERENCES.....	78
7. APPENDIX.....	101
ARAB SUMMARY.....	

LIST OF TABLES

Table (1):	Some physical and chemical characteristics of the investigated soil.	29
Table (2):	Some chemical and bacteriological characteristics of the studied sewage sludge of Abu-Rawash station.....	30
Table (3):	Changes of soil pH in the rhizosphere of corn and faba-bean plants as affected by sewage sludge treatments.....	101
Table (4):	Available micronutrients and heavy metals in the rhizosphere of corn and faba-bean plants. ..	102
Table (5):	Rate of respiration (CO ₂) in the rhizosphere of corn and faba-bean plants as affected by sewage sludge treatments.....	103
Table (6):	Nitrogenase activity in the rhizosphere of corn and faba-bean plants as affected by sewage sludge treatments.....	104
Table (7):	Changes of <i>Coliform</i> group counts in the rhizosphere of corn and faba-bean as affected by sewage sludge treatments.....	105
Table (8):	Changes of <i>Salmonella</i> & <i>Shigella</i> counts in the rhizosphere of corn and faba-bean as affected by sewage sludge treatments.	106
Table (9):	Values of leaf area (cm ²) and NPK % in ear leaves of corn and leaves of faba-bean plants grown in soil treated with sewage sludge.....	107

Table (10): Micronutrients and heavy metals content in leaves of corn and faba-bean plants grown in soil treated with sewage sludge.....	108
