

CONTENTS

	PAGE
1- Introduction	1
2- Review of Literature	3
2-1 Biology of Rhizosphere	3
2-1-1 Rhizosphere effect	3
2-1-2 Microbial populations in the rhizosphere	4
2-1-3 Root Exudates	4
2-1-4 Significance of root exudates	7
2-1-5 Some factors affecting exudation	7
2-1-5-1 Plant species	
2-1-5-2 Age of plant	
2-1-5-3 Soil moisture content	
2-1-5-4 Medium supporting the roots	
2-1-5-5 Light and Temperature	
2-2 Degradation of Organic Compounds	10
2-2-1 Biological and non Biological Degradation	10
2-2-2 Biodegradation of organic compounds	11
2-2-3 Principles of biodegradation	12
2-3 Bioremediation	13
2-3-1 Phytoremediation	14
2-3-1-1 Plants and organic contaminants	
2-4 Biodegradation of organic compounds in the rhizosphere	15
2-4-1 Biodegradation of <u>p-nitrophenol(PNP)</u>	16
2-4-1-1 Occurrence of (PNP)	
2-4-1-2 Importance of PNP	

2-4-1-3 Biodegradation of P -nitrophenol in pure cultures	
2-4-2 Biodegradation of 2,4-D	21
2-4-2-1 Metabolism of 2,4-D in plants	
2-4-2-2 Microbial degradation of 2,4-D	
2-4-2-3 Persistence and Degradation Rates of 2,4-D	
2-4-2-3-1 Concentration and Rates of Application	
2-4-2-3-2 Soil Type	
2-4-2-3-3 Moisture and Temperature	
2-4-2-3-4 pH	
2-4-3 Biodegradation of Glyphosate	28
2-4-3-1 Mode of action of glyphosate	
2-4-3-2 Behaviour of glyphosate in soils and its degradation	
2-4-3-3 Degradation of glyphosate by microorganisms	
2-4-3-4 Factors influencing the degradation rate of glyphosate	
3- MATERIAL AND METHODS	32
3-1 Soil sampling	32
3-2 Chemicals used	32
3-3 Plant materials	33
3-3-1 Seed sterilization	
3-3-2 Cultivation of seedlings	
3-4 Measurement of Mineralization	34
3-5 Preparation of natural root exudates	36
3-6 Preparation of synthetic root exudates	37
3-7 Detection of Mineralization	37
3-8 Data presentation	37
3-9 Statistical Analysis	37

4-	RESULTS AND DISCUSSION	39
4-1	Mineralization of PNP in the Rhizosphere	39
4-1-1	Mineralization of PNP in the presence of corn plant in clay loam soil	39
4-1-2	Mineralization of PNP in the presence of soybean plant in clay loam soil	42
4-1-3	Mineralization of PNP in the presence of corn plant in silty loam soil	45
4-1-4	Mineralization of PNP in the presence of soybean plant in silty loam soil	48
4-1-5	Mineralization of PNP in the presence of corn root exudates in clay loam soil	51
4-1-6	Mineralization of PNP in the presence of soybean root exudates in clay loam soil	55
4-1-7	Mineralization of PNP in the presence of synthetic root exudates in clay loam soil	58
4-2	Mineralization of 2,4-D in the Rhizosphere	61
4-2-1	Mineralization of 2,4-D in the presence of corn plant in clay loam soil	
4-2-2	Mineralization of 2,4-D in the presence of soybean plant in clay loam soil	67
4-2-3	Mineralization of 2,4-D in the presence of corn plant in silty loam soil	70
4-2-4	Mineralization of 2,4-D in the presence of soybean plant in silty loam soil	70
4-2-5	Mineralization of 2,4-D in the presence of corn and soybean root exudates in clay loam soil	75

4-2-6 Mineralization of 2,4-D in the presence of synthetic root exudates in clay loam soil	81
4-3 Mineralization of Glyphosate in the Rhizosphere	85
4-3-1 Mineralization of glyphosate in the presence of corn plant in clay loam soil	85
4-3-2 Mineralization of glyphosate in the presence soybean plant in clay loam soil	88
4-3-3 Mineralization of glyphosate in the presence of corn and soybean plants in silty loam soil	91
4-3-4 Mineralization of glyphosate in the presence of corn root exudates in clay loam soil	96
4-3-5 Mineralization of glyphosate in the presence of soybean root exudates in clay loam soil	99
4-3-6 Mineralization of glyphosate in the presence of synthetic root exudates in clay loam soil	102
SUMMARY AND CONCLUSION	105
