

## **CONTENTS**

# CONTENTS

	Page
I - INTRODUCTION. . . . .	1
II- REVIEW OF LITERATURE . . . . .	3
1- Effect of salinity on growth measurements ..	3
2- Effect of salinity on dry weight . . . . .	12
3- Effect of salinity on leaf pigments content	14
4- Effect of salinity on leaf and root mineral composition . . . . .	18
III- MATERIALS AND METHODS .. . . .	27
IV - RESULTS AND DISCUSSIONS . . . . .	32
1- Effect of salt concentrations and sodium adsorption ratio(S.A.R.) in irrigation water on growth measurements of Gizi and Sultani Fig plants. . . . .	32
a- Effect on stem length and the increase in stem length .. . . .	32
b- Effect on number of leaves per plant . . .	35
c- Effect on leaf area . . . . .	37
2- Effect of salt concentrations and sodium adsorption ratio(S.A.R.) in irrigation water on the dry weight of plant organs and top/root ratio . . . . .	44
3- Effect of salt concentration and sodium adsorption ratio(S.A.R.)and cultivar on leaf chlorophyll and carotene content . . . . .	54
4- Effect of salt concentration and sodium adsorption ratio(S.A.R.) in irrigation water on leaves and roots mineral composition . . .	61
a- Chloride content . . . . .	61
b- Sodium content . . . . .	63
c- Nitrogen content . . . . .	69
d- Phosphorus content . . . . .	71
e- Potassium content . . . . .	77
f- Calcium content . . . . .	79
g- Magnesium content . . . . .	85
V - SUMMARY AND CONCLUSION . . . . .	91
VI - LITERATURE CITED . . . . .	94
VII - ARABIC SUMMARY . . . . .	113
