

CONTENTS

	<u>Page</u>
I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
1. Source of pesticide residues in soil.....	3
2. Persistence and accumulation of pesticide residues in soil	4
3. Absorption and translocation of pesticide residues in plants.....	5
a. Absorption and translocation of non systemic insecticide residues.....	6
b. Absorption and translocation of systemic insecticide residues.....	8
4. Side effect of pesticide residues on plants	21
a. Effect on germination	21
b. Phytotoxicity and effect on growth.....	23
c. Effect on yield and quality of yield....	26
d. Effect on plant physiology	27
e. Effect on plant cells	28
f. Effect on nodulation bacteria.....	29
III. MATERIALS AND METHODS	32
1. Soil source	32
2. Soil analysis	32
3.a. Insecticides used	32
b. Concentrations of insecticides used.....	36
c. Soil treatment by insecticides.....	36

<u>Contents (Cont.)</u>	<u>Page</u>
4. Irrigation system	36
5. Inoculation with nodule bacteria.....	37
6. Anatomical and Histological studies.....	37
7. Absorption and translocation of lindane and endrin by broad beans plants.....	38
IV. RESULTS	40
1. Analysis of the soil used	40
a. Mechanical analysis	40
b. Microbiacal analysis	40
c. Chemical analysis	40
2. Effect of insecticide residues on broad beans (<u>Vicia faba</u> L.)	40
a. Effect on germination	41
b. Effect on the growth	42
c. Effect on flowering	51
d. Effect on the histology of root	53
f. Absorption and translocation of insecti- cide residues by broad bean plants.....	57
3. Effect of insecticide residues in soil on compea (<u>Vigna sinensis</u>)	58
a. Effect on germination	58
b. Effect on root growth	58
c. Effect on stem growth	63

<u>Contents (Cont.)</u>	<u>Page</u>
d. Effect on nodulation	67
V. DISCUSSION	72
VI. SUMMARY	78
VII. REFERENCES	80
ARABIC SUMMARY
