INTRODUCTION.	1
REVIEW OF LITERATURE:	3
I. Light and pheromone traps for estimating population of the cotton leafworm in relation to temperature and relative humidity.	3
II. Relationship between the captured male moths of <i>S. littoralis</i> and the egg-masses.	6
III. Relative toxicity of bioinsecticide against lepidopterous insects.	7
IV. Effect of Insect Growth Regulators (IGR's) on the biological aspects of <i>S. littoralis</i> .	9
V. Effect of plant extracts on <i>S. littoralis</i> .	13
MATERIALS AND METHODS:	20
I. Comparison between the male catch of <i>S. littoralis</i> in the light and in the sex-pheromone traps.	20
II. Daily activity of the cotton leafworm moths captured by sex-pheromone traps in relation to temperature and relative humidity.	23
III. The relation between the captured moths and the egg-masses on the cotton plant leaves.	24
IV. Rearing technique of the cotton leafworm <i>S. littoralis</i> .	24
V. Effect of larval feeding on the microbial preparation "Bio-clean" on <i>S. littoralis</i> .	25
VI. Effect of IGR compounds on the cotton leafworm.	26
VII. Effect of water suspension of <i>Clerodendron inerme</i> on <i>S. littoralis</i> .	28
RESULTS AND DISCUSSION:	29

PART I. U.V. light and Sex-pheromone traps	
for ecological estimations .	29
1- Population dynamics of <i>Spodoptera littoralis</i> adults.	29
2- Comparison between <i>S. littoralis</i> male catch by using the U.V. light and Sex-pheromone traps.	34
3- Effect of weather factors.	38
4- Relationship between the volume of moths' catch and the cotton leafworm egg-masses in cotton fields.	41
5- Comparison between infestation with pheromone traps and control areas.	46
6- Effect of the mean temperature on the egg-laying activity of <i>Spodoptera littoralis</i> moths.	50
PART II . Non-chemical substances on <i>Spodoptera littoralis</i>:	55
1- Toxicological and biological activity of Bio-clean on <i>Spodoptera littoralis</i> .	55
2- Toxicological and biological activity of " IGR compounds" on <i>Spodoptera littoralis</i> .	82
3- Toxicological and biological activity of <i>Clerodendron inerme</i> . on <i>Spodoptera littoralis</i> .	125
