

### ACKNOWLEDGEMENT

I wish to express my gratitude to prof. Dr. M. Khairat I. Saleh, Professor of Chemistry of Pesticides, Faculty of Agric., Moshtohor, Zagazig University for his valuable supervision during the period of this study, and continuous discussion this work.

The author extends his gratitude to Prof. Dr. El Sayed Abdel-Karim, Professor of Econ. Entom., Faculty of Agric. Moshtohor, Zagazig University for his help, encouragement, valuable advises and suggestion during the preparation and revision of this manuscript.

The plan of this study was suggested by Dr. Said Saddik Ahmed, Associate Professor of Nematology, Plant Protection Department Faculty of Agric. Moshtohor, Zagazig University. The author extends his gratitude to Dr. Said Saddik Ahmed, for his kind help and for providing me with all required facilities during this work and for writing the manuscript.

My deepest gratefulness to Prof. Dr. Abd El-Monem Y. Elgindi, Prof. of Nematology center, Fac. of Agric. Cairo Univ. For his help during the analysis of plant contents.

Finally I wish to express my gratitude to all my colleges and all the members of plant protection Department, Moshtohor, Zagazig University for their help.

IV- EXPERIMENTAL RESULTS .....	41
A- Effect of Aldicarb and Phenamiphos at different concentration levels on <u>Meloidogyne incognita</u> population and host growth response of Tomato <u>Lycopersicon esculentum</u> C.V. Beto 86 .....	41
B- Effect of the time of nematicide application on <u>M. incognita</u> population, growth response, chlorophyll and carotene contents of Tomato plants .....	48
C- Effect of fenvalerate, Mancozeb and Benomyl on <u>M. incognita</u> population, host growth response, chlorophyll and carotene contents, number of flowers and plant fruit setting of tomato ( <u>L. esculentum</u> ) .....	59
D- Effect of different levels of phenamiphos and Oxamyl on <u>M. incognita</u> population and growth response of egg-plant ( <u>Solanum melongena</u> ) .....	61
E- Effect of fenvalerate, Mancozeb and Benomyl on <u>M. incognita</u> population, host growth response, chlorophyll and carotene contents of egg-plant. ....	69
F- Effect of Aldicarb and Phenamiphos at different levels on population of <u>M. incognita</u> and host growth response of pepper ( <u>Capsicum annum</u> ).....	72
G- Effect of Oxamyl and Phenamiphos at different concentration levels on <u>M. incognita</u> population, host growth response of cow-pea ( <u>Vigna sinensis</u> ). ....	78

	<u>Page</u>
H- Effect of Phenamiphos and Oxamyl at different rates on <u>Rotylenchulus reniformis</u> development, host growth reponse and nutrient status of Potato ( <u>Solanum tuberosum</u> ) .....	79
