	Page
I. INTRODUCTION	1
II. REVIEW OF LITERARUE	7
III. MATERIALS AND METHODS	68
IV. RESULTS AND DISCUSSION.....	87
IV.I. Experiment, I “Fruitful Trees”.....	87
IV. I. I. Vegetative growth.....	87
IV. I. II. Leaf chemical analysis	94
IV.I.II.1.Leaf photosynthetic pigments content	94
IV. I. III. 2. Leaf total phenols; indoles and free amino acids contents...	101
IV. I. II. 3. Leaf catalase and peroxidase enzymes activities.....	103
IV.I.II.4.Some endogenous growth substances (phytohormones) contents in leaves of fruitful Citrus trees.....	109
IV. I. II. 5. Leaf mineral composition.....	111
IV.I.II.5.1.Leaf macro nutrient elements content.....	113

IV.I.II.5.2. Leaf micro nutrient elements content.....	117
IV. I. III. Flowering measurements.....	128
IV. I. III. 1. Number of inflorescences and their type.....	128
IV. I. III. 2. Flowers nature.....	129
IV. I. III. 3. Pollen grains viability.....	131
IV. I. IV. Productivity measurements.....	133
IV. I. IV. 1. Fruit retention and preharvest drop.....	133
IV. I. IV. 2. Yield	137
IV. I. IV. 3. Fruit quality.....	140
IV. I. IV. 3. 1. Fruit physical properties	140
IV.I.IV.3.2. Fruit chemical properties..	147
IV.I.IV.4. Fruit peel and pulp mineral composition	151
IV. II. Second experiment “potted valencia nursery trees “transplants”.....	171
IV. II. I. Vegetative growth measurements....	171
IV. II. II. Leaf chemical analysis.....	186
IV. II. II 1. Leaf photosynthetic pigments content.....	186
IV. II. II. 2. Leaf mineral composition.....	193

IV. II. II. 2. 1. Leaf macro nutrients content.....	195
IV. II. II. 2. 2. Leaf micro nutrients content.....	201
V. II. III. Residual effect of irrigation water resource used on some soil physical and chemical properties.....	215
V. SUMMARY AND CONCLUSION	221
VI. LITERATURE CITED	244
VII. ARABIC SUMMARY.....	-
