I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
III. MATERIALS AND METHODS	67
IV. RESULTS AND DISCUSSION	82
IV.I. First experiment	82
IV.I.I. Effect of salt concentration and sodium adsorption ratio and chloride level (Cl:SO₄) ratio in irrigation water on growth measurements of three apple rootstocks transplants	82
1. Effect on stem diameter (cm.)	83
2. Effect on plant height (cm.)	84
3. Effect on root length (cm.)	88
4. Effect on total shoots length per transplants (cm.)	90
5. Effect on number of leaves per plant	93
6. Effect on number of laterals per plant	95
7. Effect on leaf area (cm ²) and assimilation area (dec ²) per plant	98
8. Effect on the fresh and dry weights of plant organs (leaves, stem, roots and total plants.)	101
IV.I.II. Effect of salt concentrations, sodium adsorption ratio (S.A.R.) and chloride level (Cl:SO₄) ratio in irrigation water on some leave physiological measurements of three apple rootstocks	110
1. Effect on leaf water potential (L.W.P.)	110
2. Effect on leaf osmotic pressure (L.O.P.)	112
3. Effect on leaf relative turgidity percent (L.R.T.)	115
4. Effect on transpiration rate (T.R.)	117
5. Effect on leaf succulence grade (L.S.G.) ...	120
6. Effect on hard leaf character (H.L.C.)	121
IV.I.III. Effect of rootstock kind, salts concentration, sodium adsorption ratio (S.A.R.) and chloride level (Cl:SO₄) ratio in irrigation water on some chemical constituents	124
1. Effect on leaves photosynthetic pigments (chlorophyll A, B and carotein contents)	124
2. Effect on stem total soluble sugars content	130
3. Effect on stem total carbohydrates content .	131
4. Effect on leaf salinity hazard coefficient (L.S.H.C.)	134
5. Effect on fresh leaf total free amino acids content	137

6. Effect on leaf proline content	139
7. Catalase and peroxidase enzymes activities	142
8. Effect on leaves mineral content	146
1. Effect on leaf chloride content	146
2. Effect on leaf sodium content	148
3. Effect on leaf nitrogen content	151
4. Effect on leaf phosphorus content	153
5. Effect on leaf potassium content	156
6. Effect on leaf calcium content	159
7. Effect on leaf magnesium content	162
8. Effect on leaf zinc content	165
9. Effect on leaf manganese content	167
10. Effect on leaf iron content	170
IV.II. Second Experiment	174
Effect of foliar sprays with some nutrient elements on salinity	
stressed transplants of three apple rootstocks	174
IV.II.I. Effect on growth measurements	174
1. Stem diameter (cm.)	175
2. Transplants height, root length and total plant length (cm.)	176
3. Number of both leaves and laterals per transplant	180
4. Average leaf area (cm ²) and total assimilation area (dec ²) /	
plant	183
5. Leaves, stem, root and total plant fresh and dry weights	186
IV.II.II. Leaf physiological properties	193
1. Leaf water potential (L.W.P.)	193
2. Leaf osmotic pressure (L.O.P.)	194
3. Leaf relative turgidity (L.R.T.)	197
4. Transpiration rate (T.R.)	198
5. Leaf succulence grade (L.S.G.)	201
6. Hard leaf character (H.L.C.)	202
IV.II.III. Chemical composition	204
1. Photosynthetic pigments (foliar pigments)	204
2. Stem total soluble sugars content	208
3. Stem total carbohydrate content	210
4. Leaf salinity hazard coefficient (L.S.H.C.)	212
5. Leaf total free amino acids and proline content	214
6. Leaf mineral composition	216
1. Leaf chloride content (%)	217
2. Leaf sodium content (%)	218
3. Leaf nitrogen content	220
4. Leaf phosphorus content	222

5. Leaf potassium content	225
6. Leaf calcium content	226
7. Leaf magnesium content	229
8. Leaf zinc content	230
9. Leaf manganese content	233
10. Leaf iron content	235
IV.II.IV. Leaf anatomical structure	237
V. Summary and Conclusion	249
VI. Literature cited	274
Arabic summary	---
