I- INTRODUCTION	1
II- REVIEW OF LITERATURE.....	3
III- MATERIALS AND METHODS.....	62
IV- RESULTS AND DISCUSSION.....	76
IV-I- First experiment: Effect of different salt concentration, sodium adsorption ratio (S.A.R.) and chloride level (Cl:SO ₄ ratio) in irrigation water on transplants of three olive cultivars.....	76
IV-I-I- Vegetative growth.....	76
IV-I-I-1- Stem, root and total plant length (cm).....	76
IV-I-I-2- Number of laterals and leaves per plant.....	81
IV-I-I-3- Average leaf area and total assimilation area/plant.....	84
IV-I-I-4- Leaves fresh weight and dry weight / Plant.	88
IV-I-I-5- Stem, roots and total plant fresh and dry weights	92
IV-I-II- Some physiological properties of leaf:.....	99
IV-I-II-1- Leaf relative turgidity.....	99
IV-I-II-2- Leaf water potential.....	101
IV-I-II-3- Hard leaf character and leaf succulence grad.....	104
IV-I-II-4- Transpiration rate and osmotic pressure.....	108
IV-I-III- Chemical composition	113
IV-I-III-1- Photosynthetic pigments (foliar pigments)	113

IV-I-III-2-Total carbohydrates and soluble sugars.....	117
IV-I-III-3- Leaf salinity hazard coefficient.....	121
IV-I-III-4-Total free amino acids and proline contents.....	123
IV-I-III-5- Catalase and peroxidase enzymes activities.....	127
IV-I-III-6- Leaf mineral composition.....	132
Leaf nitrogen content.....	132
Leaf phosphorus content.....	134
Leaf potassium content.....	136
Leaf calcium content.....	140
Leaf magnesium content.....	142
Leaf sodium content.....	145
Leaf iron content.....	148
Leaf manganese content.....	150
Leaf zinc content.....	152
✓ IV.I. Second experiment: The effect of foliar sprays with phosphorus, potassium and zinc on three olive cultivars irrigated with salinity water	156
IV-II-I- Vegetative growth:.....	156
IV-II-I-1- Stem, root and total plant length (cm).....	156
IV-II-I-2- Number of laterals and leaves per plant	160
IV-II-I-3- Average leaf area and total ssimilation area/plant	162

IV-II-I-4- Leaves fresh weight and dry weight per plant....	165
IV-II-I-5- Stem, roots and total plant fresh and dry weights.....	168
IV-II-II- Leaf physiological properties	173
IV-II-II-1- Leaf relative turgidity.....	174
IV-II-II-2- Leaf water potential.....	175
IV-II-II-3- Hard leaf character and leaf succulence grade...	177
IV-II-II-4- Leaf succulence grade.....	179
IV-II-II-5- Transpiration rate.....	181
IV-I-II-6- Osmotic pressure.....	182
IV-II-III- Chemical composition	185
IV-II-III-1-Photosynthetic pigments (foliar pigments)	185
IV-II-III-2-Stem total carbohydrates and soluble sugars	188
IV-II-III-3-Leaf salinity hazard coefficient	191
IV-II-III-4-Leaf total free amino acids and proline contents	193
IV-II-III-5- Leaf mineral composition.....	196
Leaf nitrogen content.....	196
Leaf phosphorus content.....	198
Leaf potassium content.....	199
Leaf calcium content.....	202
Leaf magnesium content.....	204

Leaf sodium content.....	206
Leaf iron content.....	208
Leaf manganese content.....	210
Leaf zinc content.....	211
IV-II-III-6- Anatomical studies.....	214
V- SUMMARY AND CONCLUSION.....	230
VI- LITERATURE CITED.....	257
ARABIC SUMMARY.....	-
