

Contents

I- Introduction.	1
II- Review of Literature.	5
III- Materials and Methods.	33
IV- Results and Discussion:	47
1- Occurrence and distribution of plant parasitic nematode associated with vegetable crops under field conditions in Sharkia and Qalubia Governorate.....	47
2- Laboratory experiment:	
A) Some factors affecting myceliogenic germination of certain antagonistic fungi.	
* Temperature.....	53
* Percentage of humidity.....	61
* Light.....	64
*pH value....	68
B) Comparative study between certain nematophagous fungi and nematicides.....	71
3-Greenhouse experiments:	
A) Effect of some nematophagous fungi filtrates on <i>Meloidogyne incognita</i> infecting tomato plants.....	74
B) Effect of some antagonistic fungi spores on <i>Meloidogyne incognita</i> infecting tomato plants.....	78

C) Effect of some antagonistic fungi filtrates on <i>Meloidogyne incognita</i> infecting eggplant	83
D) Effect of some antagonistic fungi spores on <i>Meloidogyne incognita</i> infecting eggplants.....	87
4- Semi-field experiment:	
A) Effect of nematophagous fungus filtrate <i>Nematotoxonus concurrens</i> on tomato plants infecting by <i>Meloidogyne incognita</i>	93
B) Chemical analysis.....	106
V) Summary and Recommendation.	113
VI) Literature Cited.	119
VII) Arabic Summery.	

Table (12)	Effect of certain nematophagous fungi filtrates on growth measurements of tomato plants infected by <i>Meloidogyne incognita</i> under greenhouse conditions	76
Table (13)	Effect of certain nematophagous fungi spores on <i>Meloidogyne incognita</i> on tomato plants under greenhouse conditions.	80
Table (14)	Effect of certain nematophagous fungi spores on growth measurements of tomato plants infected by <i>Meloidogyne incognita</i> under greenhouse conditions	81
Table (15)	Effect of certain nematophagous fungi filtrates on <i>Meloidogyne incognita</i> on Eggplant under greenhouse conditions.	84
Table (16)	Effect of certain nematophagous fungi filtrates on growth measurements of eggplant infected by <i>Meloidogyne incognita</i> under greenhouse conditions	85
Table (17)	Effect of certain nematophagous fungi spores on <i>Meloidogyne incognita</i> on Eggplant under greenhouse conditions.	90
Table (18)	Effect of certain nematophagous fungi spores on growth measurements of eggplant infected by <i>Meloidogyne incognita</i> under greenhouse conditions	91
Table (19)	Effect of filtrate of nematophagus fungus <i>Nematoctonus concurrens</i> on <i>Meloidogyne incognita</i> on tomato plants under semi-field conditions.	95
Table (20)	Effect of filtrate of nematophagous fungus <i>Nematoctonus concurrens</i> on growth measurements of tomato plants infected by <i>Meloidogyne incognita</i> .	96
