Table (13): Changes in fruit juice total soluble solids (T.S.S.) percentage of Amaar apricot cv. in response to some postharvest treatments during cold storage at "5°C" in 1988 and 1989 seasons. 94

Table (14): Changes in fruit juice total soluble solids (T.S.S.) percentage of Amaar apricot cv. in response to some postharvest treatments during cold storage at "0°C" in 1988 and 1989 seasons. 95

Table (15): Changes in fruit juice total acidity percentage of Amaar apricot cv. as affected by some postharvest treatments stored under room condition during 1988 and 1989 seasons... 98

Table (16): Changes in fruit juice total acidity percentage of Amaar apricot cv. in relation to some postharvest treatments during cold storage at "5°C" in 1988 and 1989 seasons. 100

Table (17): Changes in fruit juice total acidity percentage of Amaar apricot cv. as affected by some postharvest treatments under cold storage at 0°C in 1988 and 1989 seasons. 101

Table (18): Fruit juice T.S.S./acid ratio of Amaar apricot cv. as affected by some postharvest treatments during storage under room condition 1988 and 1989 seasons. 103
