I. INTRODUCTION	1
II. REVIEW OF LITERATURE.....	4
III. MATERIAL AND METHODS.....	58
IV. RESULTS AND DISCUSSIONS.....	68
IV-1. Response of some vegetative growth.....	68
IV-I-1- Average increase % in shoot length (cm.)	69
IV-I-2- Average number of leaves per shoot.	71
IV-I-3- Increment percentage of trunk diameter.	73
IV-I-4- Leaf dimensions (leaf length and width).	77
IV-I-5- Leaf shape index.	79
IV-I-6- Leaf area (cm ²).	83
IV-I-7- Leaf dry weight (mg.).	85
IV-II- Response of nutritional status "leaf mineral content"	89
IV-II-1- Leaf nitrogen content.....	89
IV-II-2- Leaf phosphorus content.	93

Title	Page
IV-II-3- Leaf potassium content.	96
IV-II-4- Leaf calcium content.	99
IV-II-5- Leaf magnesium content.	102
IV-II-6- Leaf iron content.	106
IV-II-7- Leaf zinc content.	109
IV-II-8- Leaf manganese content.	113
IV-III- Response of fruiting parameters	116
IV-III-1- Fruit set percentage.....	116
IV-III-2- Yield (kgs/tree).....	118
IV-III-3- Yield per tree as number of fruits	123
IV-III-4- Yield increment % in relation to the control	125
IV-IV- Response of some fruit characteristics	129
IV-1- Physical fruit characteristics	129
IV-1-a- Fruit weight (gm).....	129
IV-1-b- Fruit volume (ml ³).....	132
IV-1-c- Fruit firmness (lb/inch ²).....	133
IV-1-c- Fruit height (mm).....	136
IV-1-e- Fruit diameter (mm).....	139
IV-1-f- Fruit shape index.....	141
IV-1-g- Flesh weight (gm.).....	144

Title	Page
IV-1-h- Seed weight (gm.).....	146
IV-1-i- Fruit flesh/seed weight ratio.....	148
IV-2- Fruit chemical characteristics:	151
IV-2-a- Fruit juice total soluble solids percentage (TSS %).	151
IV-2-b- Fruit juice total acidity (%).	154
IV-2-c- Rate of fruit juice total soluble solids percentage / total acidity percentage (TSS/acid ratio).	156
IV-2-d- Total sugars (%).....	158
V. SUMMARY AND CONCLUSION.....	162
VI. LITERATURE CITED.....	173
ARABIC SUMMARY.....	-
